ISO14001:2015 & ISO45001:2018

Clause 6.1: Actions to address vulnerabilities associated with threats and opportunities.

Reference Standards

Clause 6.2: HSE objectives and planning to achieve them. PSM (22 Elements) Model

Process Safety Information: It provides a foundation for identifying and understanding the hazards involved in the process. It ensures that PSM goals of HSE are achieved by providing process safety documentation. A PSI package shall be prepared for each process unit. Documents of the PSI package should be maintained up to date for the life of each process unit.

Risk Assessment and Process Hazard Analysis: A systematic and comprehensive study to identify and evaluate the significant hazards of the process and the safeguards associated with Highly Hazardous Processes (HHP) and Lower Hazard Operations (LHO). Process Hazard Analysis systematically identifies the safety hazards such as potential for fires, explosions and / or release of toxic materials, and is a well-defined program to remove or lower these hazards. Goals, Objectives and Plans: The purpose of this element is to provide guidelines for establishing realistic, achievable and quantifiable safety goals and objectives. Managing safety, like managing other aspects of a business, includes setting of performance goals and objectives which should be Specific, Measurable, Attainable, Result Oriented, Time Bound (SMART) and within the sphere of influence of the person and group who is to be held accountable for achievement.

This Section's Objectives

- Develop processes and prepare plans to establish HSE System.
- Identify significant HSE vulnerabilities, threats, opportunities and associated Impact.
- Study HSE vulnerabilities, threats, opportunities and identify compliance obligations.
- Address HSE vulnerabilities, threats, opportunities and associated Impact in the light of human rights, operational controls and applicable laws & regulations
- Set SMART HSE objectives for all relevant areas to prevent incidents and pollution.

5.1.1 Purpose and Scope

- The purpose of ERM framework is to assist all Directorates of the company in integrating risk management into "significant" activities and functions in a consistent and systematic manner across all levels of the organization
- Being a crucial element of Governance i.e. corporate decision-making and strategy-setting process, ERM framework is aligned with company's strategic objectives, such as ensuring energy security, operational efficiency, financial stability, and compliance to provide a system to manage following broad categories of enterprise risks:

External Influencing Factors	Internal Influencing Factors
- Strategic	- Infrastructure
- Reserves	- Process
- Country Risk – Geo/ Socio Political	- Social
- Financial / Economic	- Operational
- Laws, Rules, and Regulations/ Compliance	- Technology
- Natural Environment / Climate-change	- Internal Environment

- The enterprise risks shall be managed to as low as reasonably practicable (ALARP) by identifying the risks (identification phase), analyzing the risks (analysis phase), evaluating the risks (evaluation phase), implementing the effective controls/barriers (treatment phase), communicating the risks (communication phase), and reviewing the risks (review phase) for:
 - Investment opportunities and value chain
 - Business development & diversification initiatives
 - Field development & production sustainability
 - Exploratory projects
 - Production operations
- Whereas, the Locations' Risk Registers will be created at the commencement of financial year/project execution for:
 - Seismic operations
 - Drilling operations
 - Production field operations
 - Brown/ green field projects (conventional/ unconventional)
 - Others (Base stores, etc.)
- This update of ERM framework has been influenced from oil and gas E&P industry best practices and standard titled ISO 31000 Principles and Guidelines for Risk Management.

5.1.2 Definitions

	T
ALARP	Principle is that the residual risk be reduced as far as reasonably practicable
(As Low As Reasonably	as any additional cost involved in reducing the risk further would not be
Practicable)	proportionate to the benefit gained.
Barrier	Functional grouping of safeguards or hazards or threats control hierarchy
	selected to prevent or limit the consequences.
Due Diligence	Process to identify, prevent, mitigate, and account for how the actual and
_	potential negative risks are addressed.
Enterprise Risk	Process effected by an entity's Board of Directors, Management and key
Management	personnel, applied in business planning, strategy setting, and designed to
(ERM)	identify potential events that may affect entity, and manage risks to be within
	the Risk Appetite, in order to provide reasonable assurance regarding the
	achievement of organization's objectives.
ERM Charter	ERM charter is a formal document that outlines Board-Risk Management
	Committee's structure, responsibilities, authorities and functions.
External Risk	Risk associated with uncontrollable sources.
Hazard (Threat/ Cause)	Any process/operation/activity/ object/ substance/ body related event or
	gap in the protection efforts or source that could potentially trigger damage/
	loss and/ or give opportunity for improvement.
Hazard	Disseminating safety information about hazards in a workplace.
Communication	
(HAZCOM)	
Hazards Control	Elimination is removal of hazard by eliminating a requirement to carry out a
Hierarchy	task, use of a particular equipment or use of a chemical.
(Barriers)	Substitution is replacement of the material; plant; equipment; process; or
(Addendum-D)	work practice with a less hazardous one.
	Engineering controls reduce the reliance of human factors; engineering
	controls can be redesign of equipment, redesign of process or increase of
	automation. Engineering controls also include change in layout, ventilation,
	guards, enclosures, firewalls etc.

Controlled Copy Do Not Duplicate For Internal Use Only

	Administrative controls are the procedural aspects, such as planned and preventive maintenance, awareness events, policies, Standard Operating
	Procedures (SOPs), work permit system, job hazards analysis, competence of personnel, etc.
	Personal Protective Equipment (PPE) is the last and might be the least effective method (to counter OH&S hazards/ threats only) as it relies on human behavior.
Risk Assessment Matrix	Visualization tool for the graphical presentation of the risks. Also known as Risk
(RAM)	Dashboard, Risk Heat Map or Risk Heat Chart, it shows likelihood on the horizontal axis (X) and consequence on the vertical axis (Y).
Response Owner	An individual or entity who facilitates the Risk Owner in managing a risk.
Risk Management Team	Team of domain professionals (subject matter experts) trained on Hazard/ Threat Identification & Risk Assessment methodologies/ ESG framework.
Key Risk Indicators	A Key Risk Indicator (KRI) is a measurable metric used to monitor the potential
(KRIs)	risks, essentially acting as an early warning system to identify potential issues before they become major problems.
Residual Risk	Residual risk is the amount of risk that remains after controls are in place or accounted for.
Risk Mitigation	The mitigation of an "actual" negative risk refers to actions taken to reduce
	the severity of the negative impact that has occurred, with any residual
	impact needing remediation. Whereas the mitigation of a "potential"
	negative risk refers to actions taken to <u>reduce the</u> <u>likelihood</u> of the negative
Diale	impact occurring.
Risk (Pating)	The effect of uncertainty on objectives. Numerical value of a risk as combination of an incident-likelihood and
Risk (Rating) Positive Risk	consequence-severity within a 5x5 risk assessment matrix.
	An "opportunity" is considered a positive risk – an event which makes objectives easier than expected.
Negative Risk	Negative risk is that event which stops or hinders the achievement of objectives. These types of events are considered as "risks".
Risk Appetite	Level of risk an organization is prepared to accept or tolerate in pursuit of its
	objectives, before action is deemed necessary to reduce the risk. In a risk
	appetite scale, these include as Risk seeking, Risk tolerant, risk neutral and risk
	averse.Risk seeking: Aggressive risk taking is required.
	 Risk tolerant: Greater than normal risk taking is tolerable due to controls.
	 Risk noteral: Risking taking is more balanced.
	 Risk averse: Risk must be avoided.
Risk Assessment	Overall process of estimating the magnitude of risk and deciding whether it is significant.
Risk Charter	It is a committee charter in a formal written document form outlining the
(Addendum-A)	intentions of the risk management committee, its authoritative powers, and its overall operating structure.
Risk Card (Addendum-F)	Document to describe elements of a significant risk (as recorded in the Risk Register) for the sake of mitigation.
Risk Criteria	Terms of reference which evaluates the significance of a risk as Low = 1-6;
	Medium = 7-12; High = 13-20; Intolerable = 21-25.
Risk Management	System to eliminate or mitigate the risks.
Risk Owner	An individual or entity accountable as well as authoritative to assess and manage a risk.
Risk Register	A comprehensive document used to scribe and rate potential risks along with
(Addendum-B)	existing and future controls.
Risk Source	Element which has potential to give rise to a risk.
Risk Treatment	Controlling, avoiding or transferring the risk.
Significant Risk	Intolerable or high risk. Terms and Definitions: Addendum F
Sustainable Development	Terms and Definitions. Addenaum r
Threat Control	Methods used to reduce the overall impact of a threat. For example, hazards
(Addendum-E)	control hierarchy
	(barriers), training & induction, local development investments & stakeholder
	initiatives, customer management, recruitment retention & skilled labor, R&D
	projects, recovery/ emergency plan, automation/ digitalization, contract risk
	management (pre/post award), surveillance & intelligence (security),
	technological & operational improvements, asset integrity management,
	strengthening resources & tools, legal defense activities, portfolio
	management, partnerships for risk management, hedging & factoring,
	insurance & guarantees, transfer of risk liability contract, sale/ closure of assets,
	carbon offset, etc.

5.1.3 Enterprise Risk Management Policy

OGDCL recognizes that an effective system of risk management and internal control is critical for its success. Company is committed to managing risks, in a manner consistent with its businesses, so as to:

- Protect its people, communities, environment, its assets and reputation;
- Ensure good governance and legal compliance; &
- Enable it to realize opportunities and create long-term shareholder value.

Controlled Copy Do Not Duplicate For Internal Use Only

OGDCL's Board of Directors oversee the risk management and control framework of the Company to ensure an appropriate control environment is established and maintained, spanning OGDCL's significant operations, financial reporting and compliance activities. The Audit and Risk Management Committees assist the Board in fulfilling its responsibilities in this regard by reviewing and monitoring financial and reporting matters, and the Company's risk management and internal control processes.

Management will be responsible for implementation of this policy through the following phases:

- Formulation of Risk Management Framework/ SOP and Risk Management Teams;
- Identification, analysis (quantification) and evaluation of risks using audit criteria;
- Compiling the enterprise-wide risks on pertinent risk registers;
- Treatment of the risks through action plans for the significant risks using risk cards; &
- Communication and review of the risks and controls (risk registers and risk cards).

Whereas the Risk Management Committee of the Board will be responsible for the following:

- Assessment of the significant risks using a risk dashboard; &
- Allocation of necessary and appropriate resources in support of risk management.

Identification and communication of vulnerabilities and changes to OGDCL's risk profile are an integral part of day-to-day management - all risk owners and response owners are encouraged to identify and manage risks in their areas of operation on a continual basis so as to develop a "risk aware" culture and an environment of continuous improvement.

5.1.4 Structure of Enterprise Risk Management (ERM)

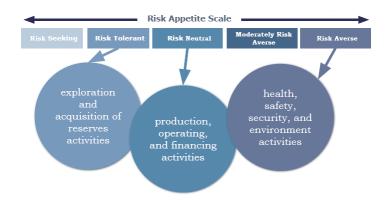

ERM Function shall operate through enterprise-wide RMTs constituted as follows:

Level I				
Team	Chairman	Secretary	Members	ERM Record
Corporate Risk Management Team (C-RMT)	MD/ CEO	As nominated (GM Level having ERM Background)	As nominated (EDs & GMs Level; however, CFO will be the mandatory member)	Corporate Risk Dashboard

The role of Level-I Risk Management Team (RMT) shall be to a) ensure the effectiveness of ERM framework by monitoring the enterprise-risks and controls as well as risk appetite, b) ensure risk-taking by the "significant" functions/ activities aligns with the strategic objectives, and c) ensure the Corporate Risk Dashboard (risk profiles/ factors) are updated for presenting to Board's RMC.

5.1.4.1 Risk Appetite

Based on the context, operational challenges and strategic outlook, OGDCL's Risk Appetite describes which risks need to be controlled more tightly and those for which there is greater appetite as exhibited:

© OGDCL's fundamental risk exposures shall be within the predefined risk boundaries as defined/updated by Level-I Risk Management Team (RMT) at the commencement of financial year using the following areas of concern:

Controlled Copy Do Not Duplicate For Internal Use Only

Area of concern	Risk Appetite Statement	Scale	KRI
Personnel Safety	Incident not to result in fatality or permanent disability	Risk averse	LTIF - Lost Time Injury Frequency
Net Reserves Replacement Ratio	Adding new reserves greater than those produced with the strategic objective in place regarding production growth, preferably through optimization efforts, unconventional extraction, etc.	Risk seeking	Net RRR
Net Production Target	Achieving oil, gas and LPG production targets provided forced curtailment, security, and force majeure situations are avoided	Risk tolerant	Net production
Project Estimation, Funding and Cost Overrun	Project cost not to exceed more than the allocated cost of any specific project as per the approved business plan	Risk neutral	Project cost
Discovery to First Production	First production from the undeveloped discoveries, which are economically viable, not to be delayed	Risk tolerant	First production in months
Supply Chain	Procurement cycle (excluding projects and seismic test line processing) from bid opening to award of contract or PO issuance to be optimized	Risk neutral	Material/ service procurement days
Cost of Production	Average cost to conventionally produce one barrel of oil equivalent (BOE)	Risk neutral	Operating cost USD per BOE
Spare Parts Availability	Availability of safety critical equipment's (SCE's) spare parts	Risk averse	%age of time the right parts are readily available when needed for repairs or scheduled maintenance
Credit Risk	Receipt of outstanding payments from the oil refineries and gas distribution companies not to exceed from the date of invoicing	Risk neutral	Debtor Turnover Days (normal debt) Debtor Turnover Years (circular debt)

- The areas of concern for which risk appetite should be within the predefined risk boundaries shall be as
 - Target Risk Appetite
 - Within Tolerance (Risk Appetite Range)
 - Intolerable

Controlled Copy Do Not Duplicate For Internal Use Only

Le	∕el	Ш

Team	Chairman	Secretary	Members	ERM Record
Financial & Value Chain Risk Management Team (F&VC-RMT)	CFO	As nominated (Fin. Background)		Financial & Value Chain Risk Register
Business Development & Diversification Risk Management Team (BD-RMT)	HOD JV	As nominated (BD Background)	Concerned GMs/ HODs & Area Managers (cross- functional)	Business Development & Diversification Risk Register
Field Development & Production Sustainability Team (FD-RMT)	HOD RMD	As nominated (Reservoir Mgt. Background)		Field Development Risk Register
Exploration Risk Management Team (E-RMT)	HOD Exploration	As nominated (Expl. Background)		Exploration Risk Register
Drilling Risk Management Team (D-RMT)	HOD Petroserv	As nominated (Drilling Background)		Petroserv Risk Register
Production Risk Management Team (P-RMT)	HOD Production	As nominated (Prod. Background)		Production Risk Register

ERM Function shall be strengthened by enabling Secretaries from Level-II RMTs to be in close liaison with Secretary C-RMT (Level-I) on risk management matters: -

Secretary C-RMT

Secretaries of RMTs

F&VC-RMT BD-RMT FD-RMT E-RMT D-RMT P-RMT

Level III

Team	Chairman	Secretary	Members	ERM Record
Location's Risk Management Team (L-RMT)	Location InCharge (PC/OM/FM/ PM/Incharge Base Store/ Project Manager, etc.)	As nominated (Technical Background)	All Sectional InCharges	Location's Risk Register

■ The roles of Level II & III Risk Management Teams (RMTs) are scribed as follows:

	Chairman	Secretary	Members
Identification	Constitute RMT and ensure provision of requisite resources for its training to enable carrying out risk identification, analysis and evaluation. Probable Risk Owner(s) and Response Owner(s) to be collectively made Members of each RMT.	Arrange training for the RMT based on TNA to carry out risk identification, analysis and evaluation, as & when required.	Participate in specific training to learn to carry out risk identification, analysis, evaluation and treatment. Team leads with the agreement of their respective heads to identify the risks at their respective functional, project or activity level.
Analysis & Evaluation	Ensure risk assessment is carried out by the RMT applying risk criterion. Endorsing the overall risks in the form of final Risk Register.	Document the risks after getting inputs from all stakeholders as result of risk assessment applying risk criterion with the aid of working papers / supporting documentation.	Participate in the risk assessment (analysis & evaluation) process applying risk criterion by focusing on risk sources. Risk Owners to carry out risk assessment at the inherent as well as residual level.
nent	Ensure timely creation of Risk Cards to mitigate the significant risks.	Assist Members in the creation of Risk Cards to mitigate the significant risks.	Response Owners to identify/ recommend Controls and timelines. Create Risk Cards to mitigate the significant risks accordingly.
Treatment	Ensure risk treatment is prioritized by RMT by controlling	Document the entire risk treatment process	Commit to treat risks by controlling (mitigating) the

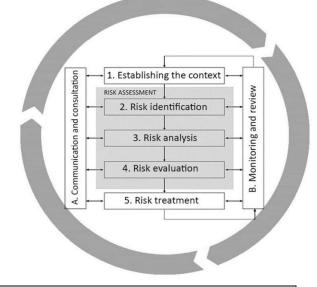

Controlled Copy Do Not Duplicate For Internal Use Only

	(noitionational policinai-in a) the USA		
	(mitigating/ minimizing) the HIGH risks through interim controls/ barriers and strategic decision making, whereas INTOLERABLE risks by stopping the activity until risks have been reduced or transferred through an outsourced service or shared through contracts.	with the aid of working papers / supporting documentation.	HIGH risks through interim controls/ barriers and strategic decision making, whereas INTOLERABLE risks by stopping the activity until risks have been reduced or transferred through an outsourced service or shared through contracts.
	Ensure Risk Register along with Risk Cards are timely presented in the RMT meeting for approval.	Circulating agenda and delivering a presentation on draft Risk Register and Risk Cards in the RMT meeting. Compile/ update and circulate the final Risk Register.	Provide inputs on the draft Risk Register and Risk Cards during the RMT meeting to finalize the same, resultantly to enable Secretary RMT to timely communicate the approved risks & controls to all concerned.
Communication	Ensure the approved risks & controls are timely communicated to all concerned.	Communicate the approved risks & controls through distribution of final Risk Register and Risk Cards to all concerned.	Follow up to confirm whether the Final Risk Register and Risk Cards have been distributed and communicated to all
Review	Ensure the compliance status regarding the Risk Appetite Statement is discussed. Ensure the approved risks and controls are reviewed and updated in the subsequent RMT meetings. Follow up the progress of mitigating significant risks on the Risk Cards.	Circulating agenda related to RMT meeting on the approved Risk Appetite Statement, risks and controls. Update and circulate the reviewed Risk Register & Risk Cards.	units'/ sub-unit's teams. Share feedback with Chairman on the mitigation on the Risk Cards as well as compliance status regarding Risk Appetite Statement.

5.1.5 Risk Management Process

- Risk management process shall comprise of six phases:
 - i. Risk Identification Phase
 - ii. Risk Analysis Phase
 - iii. Risk Evaluation Phase
 - iv. Risk Treatment Phase
 - v. Risk Monitoring & Review Phase
 - vi. Risk Communication & Consultation Phase

5.1.5.1 Risk Identification Phase

- The enterprise risks shall be identified and assessed by the respective <u>Level II</u> RMT at the time of developing annual business plan (budget).
- Whereas, locations' <u>risks</u> shall be identified and assessed by the respective <u>Level III</u> RMT at the time of commencement of financial year/ at the time of project execution.
- For each risk event, respective RMT shall identify the risks by focusing on the following risk-sources (but not limited to):

Source	Detail					
Context	vision, mission, strategic direction, objectives, etc.					
Human	awareness, competence and experience of workforce,					
потпаті	contractors, service companies, etc.					
Machine	aging factors and integrity of infrastructure, design, equipment,					
Macrine	tools, safeguards, etc.					
Material	quality of chemicals, parts/spares, backup machines, etc.					
Method	mechanism, processes, supply chain systems, practices, policies,					
Memod	operating procedures, work instructions, drawings, modelling, etc.					
Technical	g&g and other studies related to sedimentary basins source rock,					
Studies	reservoir, seal & trap, reservoirs porosity, permeability, & fluid					

		saturations, reservoirs fluid flow, volume, temperature & pressure changes, diagnostic, etc.
	Budget	income/expenditure estimates for a set period for business planning
	Portfolio	sources of energy production, including renewable and non- renewable resources, strategically balanced to meet the energy demands while ensuring sustainability and reliability
	HC Product	product's characteristics & quality with respect to lifecycle
	Record	historical logs, audits/ inspections, STOP cards, permits, JHAs, shutdown/ breakdown/ accidents history or trend, maintenance history, risk registers of associated operations/ activities, etc.
	Legal Framework	applicable laws, regulatory/other requirements, etc.
	Social Factors	workload, working hours, working culture, leadership style, etc.
	Ext. Environmer	flora, fauna, protected areas, terrain, climatic region, aquifers, water bodies, neighboring industry, socio-economic & security conditions, ethnic values, etc.
	Financial Environmer IT	business firms, investors, and markets including banks, investment
	11	algorithms, software, hardware, herworks, etc.
	_	er (template, Addendum-B) to be used to document the risks. ch risk event, the following shall be scribed in the Risk Register:
	Risk Ever Risk Ever C)	nt nt Category/ Sub-category (Risk Event Categorization, Addendum
	Applical	ble Hazards/ Threats/ Causes (Addendum-D)
		Controls/ Barriers already in place using Hazards/ Threat Control y (Definitions) and/ or List of Controls (Addendum-E).
5.1.5.2 Risk Analysis Phase		k (with Existing Controls/ Barriers) and Residual Risk (after ing Further Controls/ Barriers) shall be calculated as
	Risk Rating following ris	(RR) or Risk Level = Consequence (C) x Probability (P) by using the sk criteria
	impact Safety, be sele Whered Climate Event (I Occurre	quence (C) Severity Table-A = numerical values attached to each pertaining to Regulatory & Legal, Social/ Community, Environment, Security, Financial and Reputation; the highest numeric value shall cted for Risk Rating or Risk Level calculation. Table-A1 be considered for Consequence Severity (C) for e-related Risks. P) Probability Table-B = numerical values attached to Probability of ence/ effectiveness of controls/ barriers. Table-C = 5x5 Risk Assessment Matrix (Risk Heat lisk Heat Chart)
	The risks sho	all be compiled objectively in the Risk Register by assigning values
	shall be me	y. ARP is not attained, Further Controls/ Barriers against the risk event entioned in the respective column and the residual risk rating or risk signed in the last column.
	_	as well as Response Owner(s) shall also be mentioned.
5.1.5.3 Risk Evaluation Phase	ratings or ri risk criteria further acti to be availe While dete (w.r.t probo scribed in T	er shall be evaluated with due diligence; For each risk event, risk sk levels and existing controls/ barriers shall be compared with the to see how fittingly the assessed (rated) risks be treated e.g. no on required; risk treatment option(s) to be applied; opportunity(ies) ed; or risk analysis phase to be redone. Training the climate-related risks & opportunities, consequences ability of occurrence) be classified into futuristic time horizons as able-A1: Consequence Severity (C) for Climate-related Risks. Can also lead to a decision to "reconsider" the strategic objectives.
5.1.5.4 Risk Treatment	Risk treatme	ent and actions shall be prioritized in the following manner:
Phase	Risk Rating (Risk Level)	Risk Treatment Action and Timescale
	Opportunity (+ve risk)	Availing Action is required for the sake of process opportunity improvement, value addition or any other benefit.
	ĺ	

Controlled Copy Do Not Duplicate For Internal Use Only

Low (Negative) [1-6] (ALARP)	Nil	No action is required.
Medium (Negative) [7-12] (ALARP)	Not Mandatory	No additional controls/ barriers are required. Consideration may be given to a more cost-effective solution or improvement that imposes no additional costs. Monitoring is required to ensure that the desired controls are maintained.
High (Negative) [13-20]	Risk Mitigation	Urgent action should be taken, and considerable resources be allocated to reduce the risk to ALARP through Management Program/ Action Plan comprising interim controls/ barriers and strategic decision making/ objectives & targets to mitigate or minimize the risk. When considering interim controls/ barriers, Hazards/ Threats Control Hierarchy or Mitigation Measures shall apply.
Intolerable (Negative)	Risk Removal	Removing the risk source.
[21-25]	Risk Avoidance	Any planned activity or decision should NOT be commenced or taken whereas an ongoing activity should be immediately STOPPED until the risk has been reduced. The ultimate decision to RESUME the activity or TAKE the risk as an opportunity shall be conditional with the approval of top management.
	Risk Sharing	Employing risk-sharing contracts to distribute potential financial losses and profits in a structured way.
	Risk Transfer	The entire activity or process may be outsourced; OGDCL, however, to retain governance responsibility for the monitoring of such outsourcing arrangements to include the arrangements for risk management.

- Risk Card (template, Addendum-F) to be used to formulate and follow-up Management Program/ Action Plan to control the significant i.e. Intolerable & High risk rating (Negative) and Opportunity (Positive risk), which includes:
 - Influencing factor
 - Event category/ sub-category
 - Risk owner/ Response owners
 - Objective and targets to be achieved
 - Methods and means to achieve the objective
 - Timeframe for completing the program and/or its elements or phases

Note: More than one Risk Card may be used to control a significant risk.

5.1.5.5 Risk Monitoring & Review Phase

- Risk Register & Controls shall be updated by respective Secretary RMT, deliberated/ examined by RMT members, and endorsed/ approved by Chairman RMT on biannual basis for any changes.
- Secretaries of all <u>Level II</u> RMTs shall submit the approved Risk Registers along with Risk Cards (Management Programs/ Action Plans) to Secretary C-RMT who, further, will consolidate/filter the risks in the Corporate Risk Dashboard.
- However, Corporate Risk Dashboard shall include only those enterprise risk profiles/ factors (usually the top ten) which are mutually agreed in the <u>Level I</u> C-RMT Meeting or Workshop or as delegated to be discussed with the Secretaries of all RMTs.
- During the normal course of action/ operations (other than the prescribed risk review frequency), a risk may escalate from High to Intolerable or Medium to High, unpredictably, when any of the following conditions (not exhaustive) are met:
 - Budget shortage/ expenditure curtailment relevant to risk control
 - Risk treatment requires expenditures that are beyond what the risk owner is authorized
 - Grievances from stakeholders to which the risk owner cannot impartially and/ or effectively respond
 - Event impacting personnel/ facilities/ environment requiring unplanned treatment measures
- When the escalation is urgent and requires transfer of risk owner, it shall be completed within 24 hours and communicated by updating the pertinent Risk Register(s); whereas the escalated risks shall be managed through regular reporting lines to the appropriate levels.
- When the objective and associated targets are achieved, the reduction in risks shall be gauged and if found satisfactory, Management Program/ Action Plan shall be closed out on the Risk Card.

Controlled Copy Do Not Duplicate For Internal Use Only

5.1.5.6 Risk Communication & Consultation	To gather different perspectives, additional insights and to align the above risk management efforts with the broader environment, further collaboration and consultation may take place where deemed appropriate as follows:
	 Input from internal stakeholders: Employees with different roles, responsibilities, and expertise. External stakeholders' viewpoint & feedback: Consultants, regulators, customers, suppliers, and other relevant parties.
	Secretary of respective RMT shall be responsible for communicating the approved risks & controls to Directorates/ Departments/ Functions/ Locations/ Sections for timely mitigation on the management programs/ action plans to reduce significant risks.
	© Concerned InCharges shall be responsible for the communication of the approved risks & controls further to the employees, contractors and service companies working within their areas of operations.
	Communication may be carried out through distribution of Risk Register/ Dashboard; meetings, toolbox talks; workshops/ training/ awareness sessions; bulletins; alerts; circulars; HazCom (signboard/poster/color-coding), etc.
	© CFO shall be responsible to disclose/ communicate the enterprise risk profiles/ factors (usually the top ten) in the financial/ sustainability reports and to the BOD.

5.1.6 Frequency of Risk Management Phases

	Board- RMC	C-RMT	F&VC-RMT BD-RMT; FD-RMT; E-RMT; D-RMT; P-RMT	Location's L-RMT		
		<u>Level I</u>	<u>Level II</u>	<u>Level III</u>		
Risk Assessment	N/A	N/A	At the time of developing annual business plan (budget)	At the time of commencement of financial year/ project execution		
Review Meetings	As required	Before the meeting of Board-RMC	Biannually (or as per requirement)	Biannually (or as per requirement)		
Trainings	As required	As required – base	ed on TNA			

■ Secretary C-RMT shall be responsible for ensuring that Enterprise Risk Management (ERM) Procedure is reviewed for any changes every three years to remain up to date with the emerging trends (if any) as well as accessible and comprehensible to all concerned for compliance.

5.1.7 ERM Performance Audits

- ERM performance shall be checked after every three years as an independent or combined audit to determine whether the ERM framework conforms to the planned arrangements; has been properly implemented & is maintained; and is effective in meeting the ERM policy; and provide feedback to management of the results of such audits."
- Auditors selected to conduct ERM performance audits shall be trained, internally or externally, on ISO 31000 Guidelines to develop auditing expertise to add value to the internal auditing process.

Controlled Copy Do Not Duplicate For Internal Use Only

Addendum A Enterprise Risk Management (ERM) Charter

Objective

The objective of ERM Charter is to clearly articulate the Committee's role and responsibilities, composition, structure and membership requirements, authority, processes and procedures, as approved by the Board, ensuring an appropriate risk-aware culture has been embedded throughout the company. It is customized to the needs of the company as well as reflects sustainable energy industry practices and objectives. ERM Charter is to act as a governance tool to reinforce accountability, transparency, and alignment of risk management with corporate strategy.

Terms of Reference

- Review the risk identification & management process developed by management to confirm it is consistent with the Company's context and addresses business planning;
- Review management's assessment of risk profiles periodically and provide an update to the Board after inquiring of management and the independent auditors about the significant enterprise-wide risks and controls;
- Oversee & monitor management's documentation of the material risks that the Company is exposed to and update as events change and risks shift and assess the steps management has implemented to manage and mitigate the identified material risks;
- Review the following with management, with the objective of obtaining reasonable assurance that all risks are being effectively managed and controlled as low as reasonably possible:
- management's appetite and tolerance for enterprise-wide risks,
- management's assessment of significant risks the Company is exposed to,
- the Company's policies, procedures, plans, processes and any proposed changes for controlling significant financial/ nonfinancial risks,
- to review with the Company's counsel, legal matters which could have a material impact on the Company's public disclosure, including financial statements; and
- Consider any other issue or matter as may be assigned by the Board of Directors.

Role and responsibilities

The Risk Management Committee assists the Board in carrying out its duties by providing independent and objective review, advice and assistance in developing Board's governance related policies and monitoring corporate activity within the scope of its concern and making recommendations to the Board for resolution. The Risk Management Committee, hence, assists the Board in the oversight of the company's risk management framework. The role of the Committee includes assisting the Board in the company's governance and exercising of due care, diligence and skill in relation to risk assessment, treatment strategies and monitoring. Consistent with the company's determined appetite for risk, it includes assisting the Board to understand risks, that may:

- impede the company from achieving its goals and objectives;
- impact on the company's business/ operational performance;
- affect the health, safety or welfare of employees and others in relation to the company's operations;
- threaten compliance with the company's regulatory and legal obligations;
- impact on the community and the environment in which the company operates;
- impact on the company's reputation and that of its people; and
- result in a liability for the company arising from the company's operations.

Additional responsibility

• To refer to and consider the applicability of industry-based disclosure topics in identifying climate-related risks & opportunities and ensure that the disclosure of information is made about where in the company's business model and value chain risks and opportunities are concentrated.

Authority

The Board authorizes the Risk Management Committee, through the Chair of Risk Management Committee, may decide to:

- hire/ retain independent risk/ actuarial/ insurance/ other Consultants to advise the Risk Management Committee or assist in the conduct of risk related issues; and
- seek any information it requires from the employees, who are directed to co-operate with the Risk Management Committee's requests, or from external parties.

Composition

The Risk Management Committee will consist of at least three, and usually no more than five, members of the Board. The Board, usually on the recommendation of its nomination Committee, will appoint Risk Management Committee members and the Chair of the Committee. Membership of the Risk Management Committee will be reviewed annually, and members are eligible for reappointment. Membership will be confirmed annually by the Board in alignment with the Annual General Meeting (AGM). The Risk Management Committee should comprise both nonexecutive and executive directors, although the majority should be non-executive independent directors. Members should be conversant with risk management principles and standards, with the majority of members having a sound understanding of the business, operations and affairs of the company and the industry in which it operates.

Important: - The Chair of the Committee must be non-executive & independent; and, also, not be the Chair of the Board.

Invitees

Non-members may attend meetings by invitation of the Risk Management Committee, including the:

- Managing Director/ Chief Executive Officer/ Chief Financial Officer.
- Executive Director(s).
- Secretary C-RMT.

Important: - These personnel may take part in the business of, and discussions at, the meeting but have no voting rights.

Controlled Copy Do Not Duplicate For Internal Use Only

Meetings

The Risk Management Committee will meet a minimum once a year and, additionally, as the Committee considers necessary. A quorum will be more than half the members. In the Chair's absence from a meeting, the members present will select a Chair for that particular meeting. All Risk Committee members are expected to attend each meeting in-person, or through other approved means, such as teleconference or video conference. The Risk Management Committee may invite other personnel to attend as it deems appropriate and consult, or seek any information it considers necessary, to fulfil its responsibilities.

Important: - The notice & agenda of the meeting may include a) update on previous agenda, b) status of top 10 enterprise-wide risks & controls, c) actionable items, and/ or d) advisories along with relevant supporting papers (if any).

Voting

Any matters requiring decision will generally be decided by consensus, or if consensus is not achievable, then by a majority of votes of members present.

Secretariat duties

The Company Secretary/ IRO (or other appropriate designated person like Secretary C-RMT will act as Secretary to the Risk Management Committee. The Secretary will assist the Chair to develop and distribute agendas, papers, minutes and calendar.

Minutes

Minutes must be prepared by Company Secretary/ IRO (or other appropriate designated person like Secretary C-RMT, approved by the Chair of the Risk Management Committee and circulated to the members within two weeks of a meeting. They must be ratified and signed by the Chair, at the next meeting of the Committee.

Reporting to the Board

The Chair of the Risk Management Committee is to report to the Board following each Committee meeting. Such reporting may be by distribution of a copy of the minutes, supplemented by other necessary information, including recommendations requiring Board's action and/or approval. The Chair of the Risk Management Committee, in consultation with MD/ CEO/ CFO, will organize the supply of information regarding the Committee's proceedings to be included in the company's annual report.

Reviews

The Risk Management Committee will review its performance on an annual basis. The review may be conducted as a self-assessment and will be coordinated by the Chair of the Risk Management Committee. The assessment may seek input from anywhere the Chair deems appropriate. Training needs will be monitored by the Chair of the Risk Management Committee. The Risk Management Committee will review this Charter and its composition annually, to ensure that it remains consistent with the Board's objectives and responsibilities. The Board may consider the Committee's review and either approve or further review the Charter.

Controlled Copy Do Not Duplicate For Internal Use Only

Addendum D List of Hazards/ Threats/ Causes (Not exhaustive)

- Physical: Electrical (shock/burn), hazardous/stored energy, radiations (ionizing or non-ionizing), revolving or rotating entities, moving entities/dynamic situation (on floor/soil, in water or overhead), falling objects, ejection (flying pieces or parts), improper storing/stacking (falling materials), improper floor or surface (tripping/slipping), high pressure points, high temperature points/surfaces/fluids, extreme low temperature points/surfaces/fluids, explosion/rupture/boiling liquid expanding vapor explosion (BLEVE), work at heights (falls), confined space (toxic gases/suffocation), obstructions/collisions/contacts/impacts (sharp edges, low head-rooms), objects under tension/induced stress, objects under compression, vibration, noise (high level/intrusive), natural hazard (storm/lightning/flood/earthquake), terrain (swamps/marshes/morass/slopes/streams), etc.
- Chemical: Toxic, chemical and physical properties of the material e.g. explosion (explosive/ chemical/ fuel/ electric), fire (electric/ chemical/fuel), splash, asphyxiation (e.g. low oxygen atmospheres, excessive CO2, drowning, excessive N2, halon, smoke, etc.), combustible materials, flammable materials, oxidizing materials, corrosive/ irritating materials, carcinogenic materials, toxic materials (e.g. H2S, exhaust fumes, SO2, benzene, chlorine, welding fumes, tobacco smoke, CFCs), dust/ particles, fumes/ vapors/ steam, mist/ fog, frost bite, etc.
- Ergonomical: Poor organization and job design, Work planning issues, Improper work environment (temperature/ humidity), Improper light (glare/ poor light), Indoor climate (too hot/ cold/ dry/ humid, draughty), Heat stress (high ambient temperatures), Cold stress (low ambient temperatures), Improper ventilation, Manual lifting, handling or shifting, Repetitive movements, Poor Posture, Poor workplace design/ layout, Congested workplace, Stressful tasks, Long sittings/ duration of work, Improper work rest cycles, Mismatch of work to physical abilities, Assigning task to unskilled/ untrained person, etc.
- Biological: Unhygienic conditions, Food contamination/ food-borne bacteria (e.g. e. coli), Water-borne bacteria (e.g. legionella), Clinical waste, Infections (blood/needles), Contagious diseases, Bacteria/ viruses (endemic/ epidemic/ pandemic), Poisonous plant (e.g. poison ivy and oak, stinging nettles, nightshade), Animal/insect bite or sting, Algae or diseased plants, Disease-vectors (mosquitoes: dengue, malaria, yellow fever; ticks: lyme disease; fleas: plague), Parasitic insects (e.g. pin worms, bed bugs, lice, fleas), etc.
- Psychological: Post-traumatic stress, burnout/ fatigue, bullying/ harassment, motion/ sea sickness, travel sickness, height phobia, violence, stress, constant low-level noise, threats of danger, discrimination, public relations, intense workloads, shift work, etc.
- § Security related: Violence/terrorism, Assault, Sabotage, Military action/civil disturbances, Pilferage/burglary, etc.
- Occupational Health: Acute coronary syndrome, Accidental trauma; Heat related disorders, Exposure to high noise; UV light; vibration; welding fumes; oil fumes; chemicals; extreme heat/ coldness; human blood; video screens; cleaning liquids, detergents and insecticide spray, Contaminated drinking water; infected sewage, Lifting of heavy weight; prolonged standing; shift work
- § Safety: Equipment malfunctions, equipment breakdowns, inappropriate machine guarding, tripping and slipping hazards, etc.

Considerations while identifying social hazards/ threats

- Diversity, equality and inclusion in the workplace
- Fair pay, living wages and other labor practices
- Employee experience and engagement
- Fair treatment of customers and suppliers
- Oversight of practices at supply chain partners
- Responsible sourcing of supplies and materials
- Community engagement and involvement
- Charitable donations and funding of social programs
- Support for human rights and international labor standards

5

Addendum E **List of Controls** (not exhaustive)

Controls	Description
1 - HAZARDS CONTROL HIERARCHY (BARRIERS)	Elimination, substitution, engineering controls, administrative controls, personal protective equipment (PPE) as defined in the Definitions Section.
2 - TRAINING AND INDUCTION	A process of knowledge and content transfer, aimed at generating learning, i.e. increasing awareness, knowledge, developing skills and abilities, modifying and/or improving behavior. It includes INDUCTION, a program designed to introduce new employees to the company, help them learn more about the company and quickly integrate with the culture, environment and colleagues and feel comfortable.
3 - CONTINUOUS TRAINING ON-THE-JOB AND KNOWLEDGE MANAGEMENT	(i) TRAINING: technical and practical training on operational skills and abilities in relation to the use of devices and equipment, systems, etc., carried out on-the-job, in a laboratory or field area; ii) KNOWLEDGE MANAGEMENT: process of managing and sharing information and company
4 - PROJECTS OR DEDICATED	knowledge (know-how, experience and lesson learned). Groups are established to cope with a specific problem and generate recommendations or work on a resolution. Such groups are generally temporary and will be dissolved when they
WORKING GROUPS 5 - ADHOC COMMUNICATION	achieve their objectives satisfactorily. A set of communication activities carried out to achieve mitigation objectives with respect to a certain risk event.
CAMPAIGNS 6 - ASSESSMENT, MONITORING & FOLLOW UP	Complex of control activities (management, operational, economic, market, scenario) aimed at i) collecting continuous and/or periodic detailed information ii) identifying the need for action and iii) verifying ex post its implementation iv) periodic audit/assessment and follow up.
7 - QUALITY CERTIFICATIONS/ ISO	External certification of compliance with requirements to meet quality assurance criteria as defined by industry standards.
8 - OPINIONS AND CONSULTANCY	Analysis and evaluation of specific issues to implement the best solution of the problems. Technical and professional consultancy.
9 - ADVOCACY, EXTERNAL RELATIONS AND COUNTERPARTY MANAGEMENT	Activities aimed at representing the company's point of view vis-à-vis various stakeholders (institutional players, society sectors, commercial counterparties) in order to reduce risk exposure.
10 - LOCAL DEVELOPMENT INVESTMENTS AND STAKEHOLDER INITIATIVES	Activity aimed at creating added value brought by OGDCL to the socio-economic conditions of a host territory through: (i) the participation of local people and businesses in OGDCL's industrial activities (ii) the transfer of skills and know-how (iv) Business investments in public services (e.g. schools, hospitals, etc.) (iii) building capacity in communities.
11 - CUSTOMER MANAGEMENT (E.G. LOYALTY, MICRO-PRICING,)	A set of systems, processes and initiatives aimed at improving customer portfolio management and relations with customers.
12 - INCENTIVES AND MBOS	Sharing of de-risking objectives into the management incentive system.
13 - RECRUITMENT RETENTION AND SKILLED LABOUR	A set of activities aimed at selecting, maintaining and developing the portfolio of skills consistent with the needs of the business. Includes trade union relations.
14 - R&D PROJECTS	Technological innovation, development of innovative skills and specialist know-how, for example through the use of proprietary technologies and innovative solutions, implementation of specific risk reduction-oriented R&D projects, R&D activities and links with international universities and partnerships also with other companies.
15 - RECOVERY / EMERGENCY PLAN	Risk/ impact containment plan that defines the trigger, the scheduled set of activities to be carried out and also the means to implement them. Plan contingencies are excluded.
16 - AUTOMATION / DIGITALIZATION	adoption of digital technologies to support and improve activities and processes.
17 - CONTRACT RISK MANAGEMENT (PRE/POST AWARD)	Use of relevant guidelines (Contract Risk Management rules) in contract negotiation and management.
18 - SURVEILLANCE AND INTELLIGENCE (SECURITY)	Physical measures both active/passive, business security or cyber intelligence.
19 - TECHNOLOGICAL AND OPERATIONAL IMPROVEMENTS AND ASSET INTEGRITY MANAGEMENT	Implementation of technological, structural and operational improvements to assets/plants or new projects in order to achieve more effective or more efficient risk containment. Including actions part of the Asset Integrity Management system and improvements aimed at reducing emissions.
20 - STRENGTHENING RESOURCES AND TOOLS	Strengthening of processes and operating methods aimed at better risk containment.
21 - LEGAL DEFENSE ACTIVITIES	Legal defense activity carried out by OGDCL professionals or entrusted to external Legal Offices.
22 - SECURITIZATION AND IN- KIND RECOVERY	Debt collection by means of contractually provided mechanisms, such as securitization and in- kind recovery.
23 - PORTFOLIO MANAGEMENT	Diversification of activities with the purpose of new assets, acquisitions, markets and procurement for de-risking purposes.
24 - PARTNERSHIPS FOR RISK MANAGEMENT	Collaboration relationship between two or more companies for the implementation of joint or complementary projects that allow the sharing / management of risk.
25 - HEDGING AND FACTORING	Insurance contracts in place at the time of evaluation. Letter of Credit, Parent Company Guarantee and other contractual guarantees that mitigate the risk wholly or partially.

26 - INSURANCE AND GUARANTEES	Hedging of the risk by financial instruments (derivatives or others) and/or assignment of receivables without recourse. Including the natural hedge.
27 - TRANSFER OF RISK LIABILITY CONTRACT	A contractual clause that, when a trigger occurs, allows the partial or total containment of the impact.
28 - SALE / CLOSURE OF ASSETS	Optimization of the portfolio of activities, assets, investments, etc. aimed at mitigating the probability of joint occurrence of related risk events.
29 - CARBON OFFSET	Carbon offsets include specific projects that either lower CO2 emissions, or "sequester" CO2, meaning they take some CO2 out of the atmosphere and store it. Some common examples of projects include reforestation, building renewable energy, carbon-storing agricultural practices, waste and landfill management, etc.

	Reputation	International concern affecting the company's ongoing business, existence; Severe, longlasting and irreversible deterioration of the reputation of the company, with reiterated long-term and strongly negative media impact	Considerable negative publicity or damage to the company's reputation at national level with wide media coverage	Negative publicity or damage to the company's reputation at national/provincial level covered by mainstream media	Minor one-off (rare) negative local publicity or visible dissatisfaction by local stakeholder groups, resolved through table of negotiations	Some attention from minor stakeholders, preemptively resolved by routine/ internal processes
	Financial	Extreme impact of investment or risk-event Routine business > 49.9 million US\$ Other/ Diversification > 99.9 million US\$	High impact of investment or risk-event Routine business 30 – 49.9 million US\$ Other/ Diversification 60 – 99.9 million US\$	Significant but containable impact of investment or risk-event Routine business 10 – 29.9 million US\$ Other/ Diversification 30 – 59.9 million US\$	Minor impact of investment or risk-event Routine business 0.025 – 9.9 million US\$ Other/ Diversification 5 – 29.9 million US\$	Not much significant impact of investment or risk-event Routine business < 0.025 million US\$ Other/ Diversification < 5 million US\$
,_	Security	Extensive loss of life, widespread severe injuries, total loss of primary services, core processes or functions	Loss of life/ serious injuries, damage to the Company assets, impairment of core processes and functions for extended period	Minor injuries, minor impairment of core functions and processes	Small procession near location with slight damage/ threat to the assets/ personnel.	Small procession near location with no damage/ threat to the assets/ personnel.
Potential Impact	Safety	Multiple Fatalities/ Disabilities	Single Fatality/ Disability	Serious injury(ies) resutting in Lost Time	Injury (or injuries) requiring medical treatment	Slight injuries requiring First Aid only
Potent	Environment	Continuous excursions beyond allowable or regulatory limits Or widespread damage to multiple environmental attributes. Consequences of the event can either not be remediated or remediation requires significant resources and time [more than a year time frame).	Intermittent excursions beyond allowable or regulatory limits Or extensive damage to the environment, consequences that can be rectified and remediated within a year's timeframe	Occasional excursions beyond allowable or regulatory limits Or environmental damage with consequences that can be rectified and remediated within a month's timeframe	Rare excursions beyond allowable or regulatory limits Or no significant environmental damage to the local environment, effects can be rectified and remediated immediately with some clean-up intervention within days	Slight environmental damage within the premises of the facility
	Social/ Community	Widespread, visible complaints and involvement of NGOs, notables, national authorities and general public	Major and repeated community & stakeholder concerns, involvement of notables, local entities	No serious community or stakeholder concerns or negative social or other media coverage that causes temporary disruption to business operation	Low impact community issues, remedied after negotiations	Low impact community issues, quickly remedied
	Regulatory & Legal	Breaches resulting in hefty penalties/imprisonment/revocation of registrations, licenses or permits	Breaches resulting in significant penatties/ ceasing of operations	Breaches resulting in warnings without penatties	Breaches resulting in exposure to legal proceedings/ show cause notices	Rectifiable breaches with no consequence to the company
		Catastrophic [Very Material] (5)	Critical [Material] (4)	nojeM [JeitneupesnoO] (S)	Marginal [Jeitneopaenoonl] (2)	Megligible [Trivial] (1)

OGF – HSE – 003 Job Vulnerability/ Hazard Analysis (JVA/ JHA)	Department / Section ICs	Location HSE IC Permit Issuer	Location IC

Controlled Copy Do Not Duplicate For Internal Use Only

5.2.1 Purpose of JVA/JHA

- A JVA/ JHA shall be intended to provide a structured approach to identifying hazards and incorporating controls measures for those hazards related to tasks.
- If JVA/ JHA shall be required for any task performed under a Permit to Work (PTW). However, there may be exceptions; In such cases, the rationale for not conducting a JVA/ JHA should be clearly stated on the PTW template.

5.2.2 Requirements for JVA/JHA

- Jobs with the worst accident history shall have priority and should be analyzed first.
- JVA/ JHA will be based upon following factors:
 - **Frequency of Accidents:** a job has repeatedly caused near hits or accidents is a candidate for JVA / JHA.
 - Rate of Disabling Injuries: Every job that has caused disabling injuries should be given a JVA / JHA.
 - Severity Potential: Some jobs may not have a history of accidents but may have the potential for a severe injury (high impact ratings).
 - **New Jobs:** Analyses of new jobs and jobs where changes have been made in processes and procedures should follow.
 - SIMOPS (Simultaneous Operations) Jobs: Jobs that involve a number of functional groups or disciplines.
- JVAs / JHAs shall be attached to the corresponding work permits and discussed during the toolbox talks / safety meetings.
- The following list is designed to assist in determining the requirement for a JVA / JHA and contains jobs that are considered DO NOT require a JHA. This list is not exhaustive and be used as a guide only:

Production – Routine Operations:

- Weekly line of sight gas detector cleaning
- Radiation surveys using the radiation survey meter
- + Lube oil top offs
- Taking water/ oil samples (LP process)
- Draining of sight glasses (to prove levels)
- + Laboratory work
- Greasing LP pumps
- Inventorying activities
- Topping off tempered water tank
- Compressor lubricator rate check
- Greasing production chokes
- Draining liquids from compressors
- Solenoid leakage checks
- + Housekeeping
- Testing export gas H2S levels
- Removal and installation of pressure gauges for calibration from block and bleeds
- Checking oil levels on chemical pumps and topping off
- Backflush process seawater strainers
- ◆ Drills
- Filling of bowzer

Maintenance – Routine Operations:

- + Housekeeping
- Test running emergency generator, fire & Foam pumps
- Test running standby machinery
- Washing gas turbine compressors
- Starting/ stopping gas turbine
- Internal visual gas turbine inspections
- Changing over equipment
- Topping off of oil and water in machinery
- Boiler water tests
- Use of Elec/Mech workshop machinery
- Use of hydraulic press
- Portable equipment testing in nonhazardous areas
- Charging of batteries
- Adding refrigerant
- Routine checking of electric motors
- Foam system checks
- CO2 room checks not including opening release stations
- Visual inspection of 440 volt MCC's prior to resetting overloads
- + Lube oil sampling
- Inspection of Slings, Shackles etc.

5.2.3 JVA/ JHA Development Team

- The Team shall constitute of the following members:
 - Team Lead: Representative from exploration, construction, seismic, production, maintenance or drilling (depending on the scope of work). This person should be experienced in the work and at least at supervisor level.
 - Representative(s) at the "hands on" level ideally, the Job Supervisor who will directly oversee the execution of the Job
 - Technical specialists / engineers who can bring additional knowledge to the assessment (if required)
 - Location HSE Rep. (if required)
 - At a minimum one representative from every discipline or contractor involved in execution of job

Controlled Copy Do Not Duplicate For Internal Use Only

5.2.4 JVA / JHA Responsibilities

- It shall be the responsibility of Job Supervisor to coordinate and conduct JVA / JHA prior to execution of the task.
- Location HSE Representative shall communicate the requirements laid down in this procedure to all employees and contractor's management.
- For activities to be carried out by projects personnel or any contractor inside plant boundary / live areas / process areas (i.e. Brown field), all risk assessments shall be reviewed and endorsed by Permit Issuer.
- In green field (development of new facility / construction sites / projects) outside of plant boundary; all JVAs/ JHAs shall be reviewed and endorsed by designated person as authorized by Location IC.

5.2.5 Modus Operandi: JVA/ JHA

Step 1 – Establish the Context

Establish the context of the scope of work required by the JVA/ JHA:

Complete Section of	of the JVA / JHA Worksheet:
Job Description	- What will be done?
	State the specific job to be performed that may have a history of
	potential for injury, incidents, safety critical, new jobs, jobs changed, new personnel performing job.
Location	- Where?
	Identify the location where the work will be conducted.
JHA Date	- When?
	Record the date that the JVA/ JHA is being recorded.
JHA Leader	- Who facilitated the JVA/ JHA?
	Record the name of the person who facilitated the JHA.
Review Team	- Who will be involved?
	Record details of the Department, responsible Job Supervisor for the work and the names of JVA/ JHA participants.
Hazard Checklist	- Identify applicable Hazards from list

Step 2 – Break the Job into Logical Steps

Divide each job into simple steps. Number these and describe what is to be done and in what order. Ensure steps are not too complicated or too simple.

Complete Section	of the JVA / JHA Worksheet:
Step No.	How many steps can the job be broken into?
	Number the steps of the job, i.e. 1,2,3 etc.
Job Step	What shall be done at each step?
	Against each step number, briefly describe what is to be done in order
	of the work to be conducted.

Note: Consider these in each step

Are there safer methods to achieve the same results?

Are there alternative methods such as avoiding confined space entries via remote device, removing task from a hazardous area, shutting in the process (consider hierarchy of controls).

Step 3 - Identify the Hazards for Each Job Step (Hazards)

For each step of the job, identify all significant hazards associated with the work, whether they are part of the employee's task or part of the job surroundings. For each of these hazards, identify the potential incident that may occur. Also identify any potential control measures that may fail as a result of the activities conducted during the job.

Complete Section	n of the JVA / JHA Worksheet:
Hazard	What can happen at each step?
	What are the potential incidents that could occur from each of the
	Job Steps?
	Are there any potential failures of existing controls that could occur
	as a result of the Job Step?
	Identify the hazard for each step of the job and the potential
	incident that may occur.
	Identify any existing control measures that may be impacted or
	compromised by the job.

Controlled Copy Do Not Duplicate For Internal Use Only

Step 4 – Develop Hazard/ Risk Elimination or Reduction Measures

Once the hazards have been identified, hazard / risk reduction or elimination measures shall be developed. When adopting measures to control a hazard, the following Hierarch of Controls should be followed.

The Hazard Control Section of the JVA / JHA shall be completed by following the below given guidelines:

Complete Section of the JHA Worksheet:

Hazard Controls

What is or will be in place to manage or remove the hazards?

For each step of the job, identify the controls in place to manage or remove the hazard. Use the hierarchy of control, i.e. elimination, substitution, redesign, separate, administrate, PPE

Are the controls listed specific and complete?

All of the controls shall be implemented before the job commences, complex controls may not be able to be implemented before commencement of the job – this will require further interim controls to be in place before commencing the job.

Have all the hazards and controls been identified from previous times that this job was completed?

Review any previous JHA Worksheet for this job, ensuring any relevant hazards and controls are included in this JHA worksheet

Step 5 – Calculate the Risk and Determination of Tolerability

The fifth and final step of risk assessment shall be to determine the risk associated with each step of the work tasks. Risk is defined as the product of the probability of occurrence (likelihood) and severity of loss (Consequence) from exposure to a hazard.

Risk Rating (RR) = Consequence (C) x Probability (P)

The Risk shall be calculated as per following 5x5 Risk Matrix (Risk Heat Map / Risk Heat Chart) while risk tolerability/treatment of each step shall be assessed as per the criteria as scribed in the Enterprise Risk Management (ERM) procedure.

5.3.1 General

- HSE Department shall be responsible for identifying the applicable regulatory and other requirements.
- HSE Regulatory Requirements shall include the national/ local regulations related to environment, occupational health & safety e.g.:
 - a) Directorate General Petroleum Concession (DGPC) Guidelines
 - b) Oil & Gas Safety Regulations (Mines Act)
 - c) IEE/EIA Regulations (Pakistan Environmental Protection Act)
 - d) Oil and Gas Regulatory Authority (OGRA) Rules & Regulations
 - e) Exploration and Production Rules (Petroleum Act)
 - f) National Environmental Quality Standards [NEQS] Rules[Pakistan Environment Act]
 - g) Electricity Rules [Electricity Act]
 - h) Wildlife Protection Ordinance [Federal/ Provincial]
 - i) Explosives Rules
 - j) Pakistan Nuclear Regulatory Authority (PNRA) Regulatory Guides
- All applicable laws, regulations and other requirements shall be listed in the Regulatory Requirements Matrix, which is maintained by the HSE Department.
- HSE Section / Department in consultation with all stakeholders shall seek, record to check compliance on all applicable laws, regulations, and other requirements and report on the Regulatory Requirement Matrix on biannual basis.

5.3.2 Access to Regulatory and Other Requirements

- Information related to regulatory and other requirements shall be obtained by contacting the regulatory bodies, browsing the official websites or through industrial associations.
- HSE Department shall track legislative and regulatory developments applicable to the oil & gas industry and area where the facility is located. The information shall be acquired from internal and external sources.
- HSE Department shall respond to the applicable changes by updating the Regulatory Requirements Matrix. The format of Regulatory Requirements Matrix is mentioned below:

	Applicable								
Requirement	Regulation, Law, Recommended Practice	Authority/ Stakeholders	Office Building	Seismic	Drilling	Production	Status of compliance with regulations/ Comments (or Action taken in case of non- compliance)		
							•		

5.3.3 New & Modified Activities & Services

- Changes to, and development of new activities, processes and services may change OGDCL legal and regulatory obligations. Such changes include:
 - a) Changes in processes and technology, and introduction of new processes/ material substitution;
 - b) Increase, reduction, or modification of the point of sources of emissions and discharges;
 - c) Changes in the inventory of chemicals and other regulated substances;
 - d) Significant expansion or reduction in business activities;
 - e) Facilities addition or relocation;
 - f) Temporary projects, such as construction, installation of new equipment
- Departmental heads shall be responsible for identifying changes in activities, processes and services that may change the facility's legal and regulatory obligations, and to communicate the same to the HSE

Controlled Copy Do Not Duplicate For Internal Use Only

Department/Section.

- Relevant changes may also be identified by the Location HSE Management Review Committee (MRC) meetings or by internal or external audits of the HSE System.
- The HSE Department shall review the reported changes and determine their legal and regulatory impact and impact. When the change triggers new regulatory requirements, the Regulatory Requirements Matrix shall be updated accordingly.
- In addition, the Regulatory Requirements Matrix shall be reviewed at least once every year.
- Based on the changes / amendments in the legislative requirements, HSE Department / Section shall seek any change(s) in the Risk Register and any need to modify & implement relevant HSE Objectives and Management Programs in consultation with all stakeholders.

5.4.1 HSE Plan

- HSE Plan shall be the cornerstone of planning & goal setting. Development of HSE Plan shall be of strategic process because it involves the best way to respond to the circumstances of business environment whether or not these are known with any degree of certainty. Being strategic, means being clear about objectives, being aware of the organization's objectives and resources, and incorporating both to be able to respond to a dynamic environment.
- An Annual HSE Activity Plan (specimen attached at Appendix A) shall be rolled out on the start of each year and then subsequently every year. The Annual HSE Plan shall be developed by HSEQ Department; reviewed and agreed by concerned management team; approved by MD/ CEO/ concerned Executive Director; and updated annually & "rolled forward" to reflect improved knowledge

Note: Following Table provides "examples" that may be referred to while setting up HSE Plan based on the identified focus areas of Facilities, People, System & Procedure and Failures. The Table provides a glossary of Objectives, Goals & Targets to be considered where applicable.

FACILITIES	PEOPLE	SYSTEMS & PROCEDURES	FAILURES
Technical audits	Incentive schemes	Emergency response training (mock up) drills	Lost Time Injury Frequent Rate
Operational audits	Percent of workforce with approved HSE training completed	Management system audits	Number of near hits per month
Percent completion of maintenance programs	Percent of workers trained (operational) - actual versus plan	Project safety reviews and actions complete	Days off sick those are not caused by reported workplace incidents
Inspections of facilities	HSE awareness programs	ISO 14001/45001 Certification	Total Recordable Injury Rate Rate (=LTI+RWC+MTC)
Management safety behavior audits	Wellbeing programs	Percent completion of planned HSE meetings; Toolbox talks	Number of spills, leaks, fires, injuries as a percent of historical average
Number of toolbox meetings/quarter	Staff and contractor employee turnover	Percent of workforce undergoing health screening.	Hazard/unsafe behaviors reported
Project HSE plan compliance	Percent line managers/superviso rs achieving 100% HSE competency	Percent complete of HSE action plans within a challenging timescale	Following an incident: identifying learning points and instigating actions to prevent recurrence
Written scheme of verification implemented	Number of hazards reported per month	Percent compliance with legal compliance register	Re-use/ Reduce/ Recycle/ Refurbish/ Repair Success
Safety equipment inspections	Senior management site visits	Percent completion of planned HSE audits	Energy efficiency/conserva tion
Calibrations	Percent attendance in HSE MRC meetings	Percent of job safety analyses performed	Emissions / Vent / Flare
Safe disposal of hazardous waste	Percent complete safety induction	Closeout from action tracking register	Bio-diversity

5.4.3 HSE Objectives

All locations shall establish HSE Objectives based on Annual HSE Plan. As next level down from the Annual HSE Plan, the location HSE Plan shall be much more detailed with all Objectives further subdivided into actions and

Controlled Copy Do Not Duplicate For Internal Use Only

responsibilities. Progress – actual versus planned – shall be monitored and discussed in HSE Management Review Committee (MRC) Meetings.

- Location HSE Plan shall be developed and rolled out within one month of the rollout of Annual HSE Plan.
- Also, based on the results of risk assessment, HSE Section in consultation with the Sectional ICs, shall set the Objectives using Risk Cards to control the Significant Risk Ratings.
- The HSE Plan shall be reviewed by the concerned Sectional IC and then discussed in the Location HSE MRC meetings for approval.
- The approved targets as per HSE Plan shall be kept with the HSE Department/ Section and displayed on notice boards, bulletin boards, and/ or electronic/ print media for easy access to employees and stakeholders.
- Progress to be reviewed by Location Management on fortnightly / monthly basis.
- When HSE performance falls below desirable level, or when there is a possibility of a non-compliance against a law or regulation, or in order to avail an opportunity for the sake of improvement, establishment of appropriate HSE Objectives shall be recommended as well.

5.4.4 Setting HSE Objectives

- The objectives shall define the goals to be achieved given in subjective terms and the target is the measurable and specific indicator related to objective. Overall following SMART approach shall be adopted:

 S: Simple

 M: Measurable

 A: Attainable

 R: Realistic

 T: Time-bound
- While executing SMART approach, impact (risk) control hierarchy shall be used to fill the HSE variances (as appeared from the results of HSE Risk Assessment).
- While formulating objectives, the following table shall be consulted to assess the vulnerabilities and check the "effectiveness" of existing controls in a given situation, which is based on lifecycle perspective of Man-Machine-Material-Method.

Machine-Marenc						
	1AM	1				
DESIGN STANDARDS	Systems or sub system elements are designed for a more severe duty than they experience	-)	The systems or sub system elements were constructed to standards lower than the current norm			
SUPPLIER (CONTRACTOR / SUB-CONTRACTOR / SERVICE COMPANY) LEVEL OF COMPLIANCE	The suppliers are more conscious and never compromise on HSE	Scenarios, where targets and objectives	The suppliers are reluctant to implement and follow HSE e.g. to remain on the lower cost side			
COMPETENCE OF OPERATOR	The operators are well- trained and skilled to operate the process systems or sub system element	to be defined →	The operators are untrained and unskilled to operate the process systems or sub system element			
MATERIAL						
	MATER	IAL				
QUALITY OF COMPONENTS (MATERIAL)	The quality of components (material) is better than the industry norm	Scenarios, where targets and objectives to be defined ->	Severe service conditions apply, e.g. highly corrosive			
COMPONENTS	The quality of components (material) is better than the	Scenarios, where targets and objectives to be defined >				
COMPONENTS	The quality of components (material) is better than the industry norm	Scenarios, where targets and objectives to be defined >				

Controlled Copy Do Not Duplicate For Internal Use Only

	withstand design conditions	to be defined →	known to have severe fatigue						
METHOD									
ACCEPTANCE CRITERION	OGDCL has a criterion to verify/ validate critical jobs and consignments to formally rule-out any potential faults and failures	Scenarios, where targets	OGDCL has not set standardized criterion to verify/ validate critical jobs and consignments						
PRODUCT CHARACTERISTICS	HSE features are intertwined in the product quality as per agreed specs & regulations before dispatch	and objectives to be defined →	HSE features are overlooked in the product quality as per agreed specs & regulations before dispatch						

- Following factors shall be considered before finalizing the objectives:
 - Financial constraints
 - Operational constraints
 - Business constraints

5.4.5 Review and Closeout

HSE Department/ Section shall monitor the progress of HSE Plan on quarterly basis or as deem practical depending upon the nature of case and reports it to the management immediately or in the Location HSE Management Review Committee (MRC) meetings.

5.4.6 Amendment of HSE Plan

- Issues related to new developments or to new or modified activities, processes and services or changes due to lifecycle perspective shall be reported to the HSE Department/ Section. Such projects may include:
 - a) Significant expansion, reduction or modification of facility;
 - b) New suppliers (contractors, sub-contractors, service companies);
 - c) Temporary project activities.
- Location HSE Management Review Committee (MRC) shall review the proposed changes and determine whether the HSE Plan needs to be amended or updated to address the change.
