

**SUBJECT: CLARIFICATIONS PRIOR TO BID (TE # PROC-LE/PT/P&P-17608/19)**

Queries raised by a prospective bidder:

- i. Total Bid Bond value is 330,000 for All Group. It means bidder is bound to participate for all groups. Whereas, for Group D, it is mentioned in detail, Bidder Should be cable Manufacturer. If we consider, Bid Bond is 330,000 for Individual Group and bidder can participate for separate group with this bid bond, then it is not valid for Group C. Because total bid value of Group C will be less than 50,000 approximately. Suggestion- to participate for individual group by relevant supplier, Bid Bond Value Should be revised according to estimated value of each Group.
- ii. For Group A, "In main SOR/prices Page No-1" Prices are required for Transformers. Where as in detail Page No. 6, Serial No. 5, List of Recommended Spares for 2 year with prices are also required. Different Supplier and Manufacturer will provide different list of spare and it will have an impact on Transformer bid Value. Suggestion- Please include List of Spares, So that all the bidders will quote in line with exact Technical Requirements.
- iii. Specify the vector group for step-up and step-down transformer. Generally in Step UP Transformer the Vector Group is Ynd1 or Ynd11 i.e High Voltage is in Star Connection and Low Voltage is in Delta Connection. In Step Down Transformer the Vector Group is Dyn11 i.e High Voltage is in Delta Connection and Low Voltage is in Star Connection.

**Reply to above queries:**

- i. Evaluation criteria for subject tender is group-wise while bid bond will remain same as it is refundable/returnable.
- ii. The prices of spare parts as mentioned at S#6 are not included in the total quoted value for group-A and subsequent evaluation. These are required for re-ordering purpose only.
- iii. The vector group as per IEC standards are considered as :

For step-up transformer            YNd11  
For step-down transformer        Dyn11
