

# Clarification No. 01

## TENDER ENQUIRY NO. PROC-SERVICES/CB/WS-3190/2018

Some of the Prospective bidders have made a few queries against the subject Tender Enquiry. The queries along with OGDCL replies are given below for information of all the prospective bidders.

Sr. #	Bidder's Query/Clarification request	OGDCL RESPONSE
1	Reference: F.1. of Annexure-A in ITB : <b><u>Please confirm that mentioned complimentary services are for assigned location/s only and provision of same at location/s other than assigned will be charged separately.</u></b>	The complementary services will be applicable for assigned locations and other than assigned locations as well.
2	Reference Annexure-A-1: Criteria for Technical Evaluation: S.N 1. In ITB: The requirement of cementing experience has been effectively increased from 5 years (in last South Tender PROC-FD_CB_WS-1734_2016) to 20 years, with 10 years mandatory and an additional 10 bonus years. This increase in experience requirement will narrow down the bidding participants reducing competition which is unfavorable for OGDCL. <b><u>Please clarify the need/basis for such increment along with its impact on performance evaluation.</u></b>	OGDCL always make necessary amendments in specifications of tenders to further refine TORs and ensure to hire quality services from prudent service companies available in the market.
3	Reference: F.1.(vi) of Annexure-A in ITB: Pumping of cement slurries/other fluids for any kind of cement Job or other than cement job at OGDCL well. <b><u>Considering Cementing Scope of work, the clause dictates pumping of fluids included in cement job i.e. pre-flushes and displacement only. Please confirm and elaborate/classify fluids "...other than cement job at OGDCL well" also please confirm that mentioned complimentary services are for assigned location/s only.</u></b>	Pumping of fluids will not be limited to cement jobs only but will cover any kind of activity or operation wherever cementing units will be required, cement units will be deployed for pumping of any type fluids at OGDCL wells.
4	Reference F.1.(vii) of Annexure-A in ITB : Any kind of pressure testing/killing operation etc. of OGDCL wells. <i>TENDER ENQUIRY NO. PROC-SERVICES/CB/WS-3190/2018</i> has cementing scope of work whereas well killing is separate service line requiring different set of skills.  1. <b><u>Please confirm that complimentary Pressure Tests include Pressure testing of Top of Liner, SBT, FIT/LOT and cement pumping lines/cement heads testing only and this pressure testing will be performed at assigned rigs only.</u></b> 2. <b><u>Please confirm that well killing to be charged separately due to involvement of additional expertise, equipment and special resources.</u></b>	4.1 All the complementary services will be applicable for assigned locations and call out locations as well. 4.2 Any kind of pressure testing and/or killing operations will not be charged separately. Only unit rate of cement units per day will be paid either call out of monthly rental which ever applicable.

5	<p>Reference: Scope of Work Annexure "A-2": Compressive strength is dependent upon Temperature and Density and requirement of same Compressive Strength across the Density and Temperature range is unrealistic because slurry design and additive requirement varies drastically in complete slurry density range in each clause . <b><u>Please provide the appropriate Temperature figures (Low, Medium and High) for each clause and required compressive strengths against each.</u></b></p>	<p>Appropriate temperature ranges with slurry densities are given in the tender.</p>
6	<p><b><u>Please specify the duration of contract, in years, to be finalized as a result of this ITB.</u></b></p>	<p>The duration of contract is 03 years as per tender advertisement; however, it can be increased or decreased at the time of approval by the Management of OGDCL.</p>
7	<p>Reference: Annexure "A" Scope of Work, Instruction to Bidder: The services which are not covered by this contract may be hired with discounted rates. The bidder will provide complete price list of their material and services along with reasonable discount but it will not be the part of contract. <b><u>Please clarify how additional additives, when used will be charged if price book not included in contract document.</u></b></p>	<p>The additional additives, if any required, will not be part of financial evaluation, however, will be paid as per our procedure.</p>
8	<p>Reference: Scope of Work Annexure "A-2 Section B: <b><u>Please specify the Fluid Loss requirement against each clause, density and Temperature values.</u></b></p>	<p>Fluids loss requirement for different temp. and density ranges of cement slurries will be decided at the time of each cement job as dictated by well conditions for better cement jobs, however, the prospective bidders may quote slurry rates on the basis of maximum dosage of fluid loss additives to minimize fluid loss as much as possible.</p>
