

## Clarification No. 01

### TENDER ENQUIRY NO. PROC-SERVICES/DO-3303/2018

#### HIRING OF CORING SERVICES

One of the Prospective bidders has made a query against the subject Tender Enquiry. The query along with OGDCL replies is given below for information of all the prospective bidders.

<b>Sr. No.</b>	<b>TENDER ENQ. REF. PAGE</b>	<b>TENDER SPECS</b>	<b>BIDDER CLARIFICATION</b>	<b>OGDCL RESPONSE</b>
2	Pages 15, Scope of Work Annexure -A	Inner Tubes	<b>Annexure "A" Scope of Work:</b> Required Inner tubes are mentioned as <b>Fiber glass tubes only</b> . Note that Fiber glass tubes can be used only in very specific job conditions, as these are with low temperature rating / limitation, normally less than 248 Deg.F. Only (Circulating temperature). As a Coring Services provider, we suggest that Aluminum Inner Tubes be allowed against this tender enquiry, as these are being used as an industry standard internationally. Aluminum tubes can withstand up to 400 Deg.F, and resultantly in more challenging conditions.	Aluminum inner tubes are allowed but price will be same. The bidder can quote for fiber glass/aluminum tubes with same price. If bidder quote both types tubes with different prices then lowest price will be considered for evaluation and payment purpose.
