

**TENDER FOR SALE OF JHAL MAGSI GAS  
PROC-FC/CB/PROJ/JM-3333/2018**

**PRE-BID CLARIFICATION # 02**

<b>Sr. No.</b>	<b>Clarification By Bidder</b>	<b>OGDCL RESPONSE</b>
1	In case the bidder offers to off-take 4 MMscf/d gas and the bid is successful, under such circumstances will the complete right of the gas reserves (35 BCF) be given to such successful bidder? Or OGDCL will allocate residual volume of available gas (i.e. 13 MMscf/d less 4 MMscf/d) to other bidder(s).	13 MMscfd processed gas will be produced from the facility and all this gas is to be sold. It can be sold to one buyer offering to off take all the gas i.e 13 MMscfd or to multiple buyers offering to off take within range of 4-13 MMscfd. In case of multiple buyers rights will be on proportionate basis. Decision to be made as per technical & financial evaluation criteria mentioned in ITB document.
2	Is it possible for the bidder to offer a phased gas off-taking mechanism, that is, starting from a minimum gas volume and increasing the volumes gradually?	In case of Raw Gas options of 7, 10 & 15 MMscfd are mentioned in ITB. In case of processed gas 13 MMscfd processed gas will be produced from the facility and all this gas is to be sold to one buyer or multiple buyers as the case may be.
