

CLARIFICATION NO. 01
TENDER NO. PROC-FC/CB/PROD/KPD-4053/2018
SCADA SYSTEM FOR ELEVEN (11) WELLS OF KPD-TAY

QUERY:

After reviewing through the specs we came on to the conclusion that this is an upgrade project with the following scope:

1. 11 new RTU stations
2. Upgradation existing ABB SCADA system and Licenses
3. Interface of ABB SCADA system to the existing Production Data Management System

For point#2 and 3, M/S OGDCL is requested to let us know that either we can upgrade or replace the already installed system/licenses.

OGDCL RESPONSE:

As per our tender documents please note that mainly there are main objectives for captioned contract

1. Engineering, Design, Procurement, Supply, Installation, commissioning of new proposed SCADA system to be installed at well sites for 11 wells.,
2. Integration of new proposed well site system through Master Radio to the existing ABB SCADA / Data Historian already installed for KPD-TAY 30 wells.
3. Integration / Interfacing of complete KPD-TAY SCADA System (existing and new proposed system) with OGDCL Production Data Management System

For further understandings / clarifications, please refer detailed specification, Scope of work, Philosophy and T&C are available in Annexure-Z.
