

CLARIFICATION#2

PROC-SERVICES/CB/EXPL-4164/2018- SEISMIC SEQUENCE STRATIGRAPHIC INTERPRETATION, ANALYSIS, STRATIGRAPHIC PROSPECT IDENTIFICATION, RISKING & RANKING FOR HYDROCARBON POTENTIAL EVALUATION OF KULACHI EL

Following Clarifications have been made in the subject tender:-

S. No.	Bidder's query	OGDCL reply
1	Please clarify the number wells which would be involved in this study.	Around 8 to 10 wells surrounding the area will be involved in this study.
2	Please clarify the type of available well logs in wells.	The newly drilled wells have complete conventional log sets, however, some of the wells to be used are quite old and will have incomplete log sets.
3	Please clarify if any core data is available? If yes, please confirm that the core description report will be provided by OGDCL.	core data will be provided by OGDCL.
4	Please clarify if the outcrop data is already acquired.	There is a basic geological field report available, but the scope of that report is quite different from what is required for this study.
5	For doing the seismic interpretation review, please clarify if the velocity model and depth converted data will be provided.	OGDCL will not provide any velocity model or depth converted data.
