

PROC-FC/CB/PROJ/QADIRPUR-4261/2019 (Clarification No. 01)

Sr. No.	Bidder Query	Clarification
1	Most of the bidders queries are about works related to M/S Solar Turbine & Services from M/S SOLAR Turbines.	<p>It is clarified that OGDCL have press tender the requirement for supply of new compressors to be coupled with MARS-100 turbine (Existing Turbines already working with MHI Compressors at Qadirpur). Since this modification project will eventually require M/s SOLAR services irrespective to compressor OEM for the following jobs:</p> <ul style="list-style-type: none">a- Control system programming modifications for new compressors operating parameters.b- Turbine – Compressor coupling design (if existing found inadequate) and turbine-compressor alignment chart.c- Any other job. <p>As it is standard industry practice that compressor parameters and anti surge parameters to be incorporated in turbine control system (already installed). Also alignment chart for turbine compressor alignment is required and normally done by the driver FSR. In this regard M/S Solar Turbines have been informed and they have nominated a focal person, whom bidders can contact.</p> <p>M/S Solar Turbines Focal Person Omar Gaafar Area Manager - Oil & Gas Sales Solar Turbines Office: +9714-8168303 Mobile: +97156-5012444 Email: Gaafar_omar@solarturbines.com</p>
