1	<p>As for the item 1, noted that it's a ball valve but please take note that for 6" 600# ball valve, there is no such design for floating ball type in the market due to the pressure rating and the size of the ball will be too heavy to be floating.</p> <p>Can we quote Trunnion type with gear operated?</p>	<p>Item # 1, must be read as Trunnion mounted ball type with gear operated instead of floating type with lever operated.</p>
