

**Technical Clarification-Power generator sets 300kva maximum with canopy mounted-
Tender #: PROC-FE/CB/EXPL-4392/2019 Closing Date: July 3rd, 2019**

The point wise reply of quires for subject case is given below:-

- 1- We would like to know what kind of working conditions this power generator sets will be used for.

These Generators sets are required in Seismic field parties to meet the power requirements in entirely open hot/cold and dusty environment, temperature -5C 55 C**

2- One condition is parallel operation, which is also called Isolated Island Operation; and the other is Series operation, which is going to be linked to the existing power grid, please kindly tell us.

These Generators sets will be used isolated to fulfill Seismic field parties camp electricity/ power requirements.

- 2- How many hours one generator set will work annually?

indented Generator is required for full day operations through out the year in entirely open hot/cold and dusty environment, temperature -5C 55 C* .*
