

Clarification-2**Tender Enquiry No. PROC-FE-CB/PROD-4439/2019****Description :** CPI Separator for produced water disposal system at Kunnar.**Bidder Query:**

With reference to subject tender, without any data about dimensions, specific gravity and content of total suspended solids (TSS) our principle will not be able to calculate fluid dynamics of solids. Therefore it will be hard to confirm the removal capacity of the Package that will be purposed.

OGDCL Clarification:

- Vendor shall design the CPI Separator according to the properties at operating conditions that are already in the mentioned datasheet. The purposed dimension by bidder may be considered with respect to provided specs.
 - Specific gravity is already provided in data sheet 0404177-PRO-DT-002.
 - There are no suspended solids present in the feed for CPI separator.
- Our Primary Objective for CPI Separator installation is to remove free oil content. However, vendor can advise us removal capacity of TSS & TDS by the proposed CPI separator.
