Subject: Pre-Bid Clarification against Bidder's Query

Case no. PROC-FE/CB/P&P-4603/2020 dated 04-02-2020

Case Title: Truck Mounted Crane and Scissor Lift for Nashpa Plant

Bidder's query:

"Please clarify and explain further point M in Scope of Supply of Mobile scissor Lift"

Referred clause / point of the specifications / terms and conditions:

"Lift movement should be manual with pneumatic tvres (04 No) & shall not be battery powered"

Explanation:

The above point related to specifications of the scissor lift is explained as under:

"While the vertical movement of the scissor lift is required to be electric with hydraulic control system (DC battery operated), the scissor is not required to be self-propelled / driven with electricity or any other source. Its horizontal movement (on road) should be manual. It should capable of being towed by a vehicle and should have pneumatic tyres and towing hook."
