

Clarification No. 01

TENDER ENQUIRY NO. PROC-SERVICES/CB/WS-4654/2020 HIRING OF DRILL PIPE, TUBING CLEANOUT & PIPE RECOVERY SERVICES

One of the Prospective bidders has made a query against the subject Tender Enquiry. The query along with OGDCL replies is given below for information of all the prospective bidders.

Sr. No.	Tender Clause Reference	BIDDER'S CLARIFICATION	OGDCL REPLY
1	2.29 The number of wells mentioned is estimated and for evaluation purpose only. Number of wells against each model may vary as per actual requirement.	The number of wells will help to quote better. Kindly provide exactly number of wells as it would help us to quote better,	The services required for DP clean out & pipe recovery is an exigency job and we cannot forecast the exact no of jobs required. As such; we've asked the services for an estimated no. of wells for evaluation purpose.
2	2.32 Charges for CTU will commence once CT is lowered into the wellbore and will cease when CT is out of the hole.	What if for some well conditions we got stuck and delayed.	The point is clear that you would be paid for CT services while you remain inside well whether you got stuck.
3	2.33 For any down hole tools, the charges will be paid for the time such tools are below the rotary table or wellhead master valve	If for any reason decided to cancel the tool and redesigned is required, this also need to be considered by the OGDCL and changes need to be paid if in some cases we need to rent out a third party tool.	Minimum inventory of down hole tools is given in the tender documents & the bidders are required to have them or ability to arrange before participating. As such; it is bidder responsibility to take care of the clause if subcontracting.
4	2.34 Material charges will be paid on the actual volumes pumped. No dead volume, etc. charges will be paid under this contract.	We can come to an agreement to design the exact volume of the job however in case there is some dead volume then you should have some space to make payment for the dead volume + provide a place to dispose off the dead volume and 3rd party company who disposes the dead volume needs to be paid by OGDCL,	Always job is designed over and above the actual volume/recipe required as such; no dead volume likewise their disposal will be paid by OGDCL.
5	2.36 If, after mobilization / reporting at site, job is cancelled then only mobilization / de-mobilization charges for crew / equipment will be paid. No job cancellation charges are admissible.	Is there any cancellation charges applicable?	No job cancellation charges will be paid, the point is clear.
6	2.48 For every job completed, 3 days of standby for crew and equipment will remain free of cost.	how can we compensate because we plan to quote with low prices and keeping a very less margin to have long lasting relationship with OGDCL hence kindly revise this point if possible,	Three days free standby is admissible for all participating bidders as such no favor/exception is possible.
7	2.49 OGDCL fluids may be pumped through the 3rd party with no extra charges.	This may lead to a liability issue.	It is normal practice for contractors to pump mud, brine, or other fluids being pumping during pipe recovery. These are standard oilfield fluids that are utilized in such operations and OGDCL does not deem any liability issue here.

8	2.50 OGDCL tools and equipment may be used in conjunction to contractor's equipment thus services will be charged at no additional cost to CLIENT.	This may lead to a liability issue.	If OGDCL intends to run any of OGDCL equipment in BHA during recovery, OGDCL will be free to do so. The contractor will be able to check the working and rating of such tool at surface and hence no liability issue may arise.
9		Any changes to the design such as additional chemicals or tools that is requested due to well conditions, extra volumes pumped, or/and higher coil tubing size is required. need to be add as extra charges (out of contract). Need to be agreed on and amended to the contract if possible.	It will always be in our consideration not to ask for any out of contract chemical/tool/CT size variation however; if well conditions demands for such an item you can submit international price list of such items along with your bid.
