

Clarification No. 02

TENDER ENQUIRY NO. PROC-SERVICES/CB/DO-4668/2020

HIRING OF CORING SERVICES

One of the Prospective bidders has made a query against the subject Tender Enquiry. The query along with OGDCL replies is given below for information of all the prospective bidders.

Sr. No.	Tender Clause Reference	BIDDER'S CLARIFICATION	OGDCL REPLY
1	Page 2 of 12, Clause-3 Inner Fiber Glass Tubes	For better core recovery, Aluminum inner tubes have more advantages over the requested Fiber Glass Inner tubes in subject tender. We request OGDCL to kindly allow us to quote Aluminum Inner Tubes, as it is now the preferred industry practice. Note that these were allowed in the previous Coring tender as well.	Inner Tubes should be quoted as per TOR.
2	Page 3 of 12, clause-11 Lump sum Operating Package rate applicable per meter Core recovery	Core recovery is dependent on various factors, in most cases beyond the Coring Supervisor's control i.e. string gets stuck during Pulling out, to release the string best possible efforts are made including Jarring, this exercise may drop the core in full or partial length? How will OGDCL evaluate in case final length of the core at surface is less than what was cut/recovered?	Payment will be made as per TOR on the basis of core recovered as clearly mentioned in clause # 11 under Terms of Reference and not on the basis of core cut.
3	Page 3 of 12, clause-12 Rate will be applicable after arrival of Equipment and Supervisor at OGDCL Well site.	Please elaborate this clause, what if (i) equipment is called earlier and crew after some days, and (ii) equipment is kept on location for the next job at the same well and Crew is released?	Standby of equipment will start when equipment will reach wellsite and similarly standby of crew will start when crew will reach wellsite.
4	Page 4 of 12, clause-18 Crew will consist of ONE person per job	Please review this clause, for the sake Personnel Safety, core handling, on site requested preservation, etc, minimum 02 men crew is required. Please allow for 2 nd man.	One crew person as per TOR.
5	Page 4 of 12, clause-22 Core Preservation in Cellophane, Aluminum foil in secure packing & Transported undamaged	Please elaborate "transported". Does OGDCL want contractor to transport cores to OGDCL Islamabad base or hand over at well site, as per standard industry practice.	Transportation will be managed as per standard industry practice.
