## **TENDER ENQUIRY # PROC-SERVICES/CB/DO-4694/2020**

### **HIRING OF OIL WELL DRILLING CONSULTANCY SERVICES FOR NASHPA & MELA WELLS**

One of the Prospective bidders has made a query against the subject Tender Enquiry. The query along with OGDCL replies is given below for information of all the prospective bidders.

<b>S.NO</b>	<b>Bidder Queries</b>	<b>OGDCL REPLY</b>
01	Is OGDCL seeking a full borehole stability work to design mud weights, mud chemistry, casing programs for managing the borehole stability? Or just analysis of possible problems in the past and recommend some future analysis works to be done?	The company seeking full bore stability work to design mud weight, mud chemistry, casing seat selection for bore hole stability and detailed analysis of possible problems in the past drilled wells and recommendation for future wells design with supporting documents and justification.
02	Similar concerns regarding other scope of work areas mentioned in the TOR? Do OGDCL want to analyze the problems thorough and recommend actual remedial measures or just identify possible problems and recommend some future analysis works to be done?	The company desires detailed study and analysis of drilled wells and actual remedial recommendations and measures to save drilling time and increase drilling progress ROP to reduced well cost.
03	Does the time line mentioned in the tender (copied under) covers the entire study duration with mentioned activities and time? 3 a) Exactly how many wells, bit designs, mud programs etc. are to be analysed as case study?	The time line mentioned in TOR is for the entire study of work.
