

**Pre-Bid Clarification-1****Tender Enquiry No. PROC-FB/CB/PROD-4891/2020****Description : GLOBE, BALL & CHECK VALVES****Bidder Query:**

For ball valves OGDCL mentions seat inserts material as RPTFE, however for item # 6~10 high pressure rating ball valves RPTFE is not recommended as RPTFE has cold-flow characteristic which will cause de-shaping of seat insert under high pressure and this consequently will cause sealing problem in the valves, for such high pressure valves Nylon/Peek materials seat inserts are required. Please confirm.

**OGDCL Clarification:**

For Item No 6,7,8 & 10 of Group-B (Ball Valves), seat insert material may please be revised as NYLON, instead of Reinforced PTFE.

For Item No 9 of Group-B (Ball Valves), seat insert material may please be revised as PEEK, instead of Reinforced PTFE.
