

PRE-BID CLARIFICATION NO. 1

TENDER ENQUIRY NO. PROC-FB/CB/RM-5001/2021 FOR 05 TON AIR WINCHES FOR RIGS

S #	Tender S.O.R Clause No. and Description	Bidder's Pre-bid Clarification	OGDCL Response
1.	<p>Terms and Conditions for Bidders,</p> <p>Clause-1: Bids from ASME certified manufacturers of Air winches or their authorized distributors will be accepted only. Copy of valid ASME B30.7 certificate in favor of manufacturer must be provided with the technical bid</p>	<p>Please be informed ASME stands for American Society of Mechanical Engineers. This is American industry association of manufacturing companies primarily within the United States and as such, has no regulatory powers or the ability to Audit or Endorse specific products (Winches, Hoist, Cranes etc.).</p> <p>ASME cannot, does not and will not “certify” or perform design reviews of any product nor do they certify any equipment manufactures or production process the way that say DNV or ISO dos. They only issue Industry Standard design guidance.</p> <p>In addition, B30.7 establishes the base line for Inspection, Load Testing, Maintenance & Operating procedures, none of which have any direct effect on the design of the “basic” winch.</p> <p>In contrast to other American agencies like ABS or European “Third” Parties such as DNV, BV NORSOK, UK-HSE...etc..... ASME’s role is very limited and as such, complete compliance is possible without any formal certification as ASME only requires..... <u>“compliance”</u></p> <p>Only COC attesting to this fact from manufacturer can be provided instead of ASME certification in favor of manufacturer as ASME doesn’t certify any manufacturer. Explained above.</p> <p>I have also attached a copy of ASME B30 for your review.</p>	<p>A certificate from manufacturer (in original and issued on manufacturer's letter head bearing OGDCL tender enquiry number and duly signed / stamped by the authorized person of the manufacturer) will be accepted stating that the offered air winches will meet ASME B30.7 standard for inspection and load testing.</p> <p>The same will also be verified by Third party inspector during pre-shipment inspection.</p>

Note: All other terms & conditions will remain unchanged.
