

From Manufacturer:

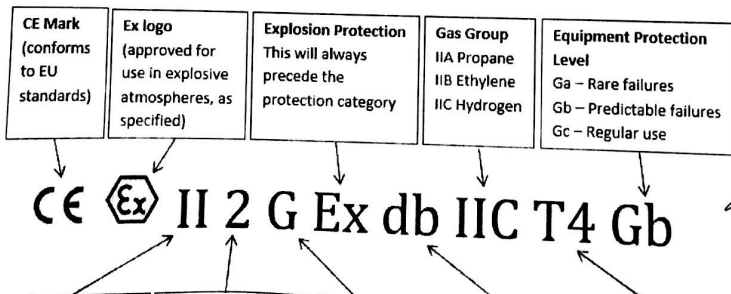

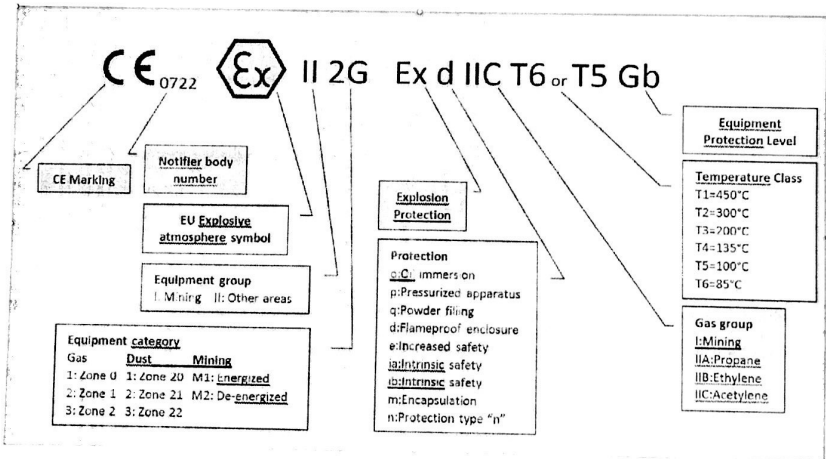

What is the type of ATEX?

Reply: **EX II 1G** sensor category is generally uses at rig site

Where 1 is for zone 0

G is for Gas atmosphere category

"ATEX Certification is a certification of equipment intended for use in potentially explosive atmospheres in the European Union. ATEX is the name commonly given to the two European Directives for controlling explosive atmospheres: 1) Directive 99/92/EC (also known as 'ATEX 137' or the 'ATEX Workplace Directive') on minimum requirements for improving the health and safety protection of workers potentially at risk from explosive atmospheres. ATEX derives its name from "ATmosphères EXplosives" (French for Equipment intended for use in EXplosive ATmospheres).
