

Clarification # 1

6. HOLD DOWN SUB, 7", L-80, 13 CHROME, 32 PPF (DRIFTED FOR 6" BIT) = 04 NOS.

Hold down sub are requested kindly clarify about the specific requirement for these as liner length is around 1500m.

Clarification # 2

Can we propose float equipment from any of our approved suppliers?

Reply:

OGDCL require HOLD down SUB on light weight liners and should operate with hanger hydraulically. this is to get the indication on upward after hanger is set as the hanger has only downward movement.

Packer hold down slip only activate once setting the liner top packer (last operations).

Therefore you are advised to confirm provision of 04 Nos hold down subs for 7" Liner Hangers as per SOR.

Liner length less than 1500m

Float equipment's only M/S Topco, Davis Linch(Forum USA),Weatherford & Halliburton acceptable if u not manufacture yourself.
