

Clarification of Tender Enquiry # PROC-FE/CB/CMT-5214 for Treating Iron, Fittings and Hoses (Group B & C)

Sr.No.	Clause	Tender Specification	Bidder Clarification	OGDCL Reply
1			<p>Group B Item 25 & 26 SOR mentions Fig 1502 against the items, this requires drawing / document from which these Fig is referred.</p> <p>Note: Hoses are required without connectors</p>	<p>FIG 1502 refers to Hammer union connections with 15000 psi working pressure rating. For further details, please visit any renowned manufacturer's website (i.e. M/S FMC). Hoses are required with FIG 1502 connections.</p>
2			<p>Group C: Item 27, 33,34 : SOR mentions Fig100 against the items, this requires drawing / document from which these Fig is referred. Note: Items 27,33 & 34 are fittings but they are made part of group B hence in our opinion shall be part of group A. We are not able to understand the logic of these items in the group which is primarily for Butterfly valve. (Items 28,29,30,31,32 are Butterfly Valves) We are interested in supply of Butterfly valves only as our principal is a valve manufacturer, they do not manufacture items 27,33 & 34 If we have to quote items 27,33 & 34 , we have to resource a separate OEM , this means to increase the cost such as separate LC's /Guarantees/shipments etc. Whereas these items can easily be quoted by a supplier interested in Group A with out any additional cost. Further a valve manufacturer will refrain to participate due to this mixup.</p>	<p>FIG 100 refers to Hammer union connections with 1000 psi working pressure rating. For further details, please visit any renowned manufacturer's website (i.e. M/S FMC). There are many manufacturers in the world including M/S FMC (for reference purpose only), that manufactures all the items in group-C.</p>
