TERMS OF REFERENCE (TOR)

FOR

HIRING OF WIRELINE LOGGING & PERFORATION SERVICES (Open Hole & Cased Hole Sections)

1. SCOPE OF WORK

- 1.1 Wireline logging, perforating and log data processing / interpretation services are required on "CALL OUT" basis for a period of three years from the issuance of LOI (subject to clause # 4 of TOR) on Exploratory, Appraisal, Development and Work over wells of OGDCL in the region of KPK & Baluchistan provinces of Pakistan.
- 1.2 The tender has been divided into "Open Hole" and "Cased Hole" sections. The bidders will have option to bid either for one of section or both sections.
- 1.3 The contracts will be awarded separately for Open Hole and cased Hole sections after respective technical and financial evaluations as per defined annexures and RFQ.
- 1.4 The estimated number of wells for Open Hole section is 30 with 50 jobs for the above mentioned period.
- 1.5 The estimated number of wells for Cased Hole section is 50 with 150 jobs for the above mentioned period.

2. ELIGIBILITY REQUIREMENTS

The bidder:

- 2.1 Must have minimum 10 years international or local experience of providing above mentioned services.
- 2.2 Must have dedicated team of experienced professionals to handle technical matters relating to all types of wireline logging operations, perforations and logs data processing/interpretation services.
- 2.3 Must be capable of providing required services / equipment as per Annexure-A2 (for Open Hole) and Annexure-A3 (for Cased Hole).
- 2.4 Must be capable of providing Wireline services simultaneously on **at least three OGDCL wells** located in the region for Open Hole services.
- 2.5 Must be capable of providing Wireline services simultaneously on at least three OGDCL wells located in the region for Cased Hole services.
- 2.6 Must confirm to carry out jobs at locations where OGDCL is active in operations.

3. TOOLS/EQUIPMENT/NOC's

- 3.1 Tools specified in Annexure-A2 & Annexure-A3 should be suitable to perform services within temperature range of 300°F to 350 °F. Tools having temperature rating more than 350 °F should also be made available as and when required for logging on high temperature wells. H2S & CO2 rated tools/equipment should also be available when required.

- 3.2 The bidder should provide the latest tools/surface acquisition and allied equipment for performing logging and perforating services as per Annexure- A2 & Annexure-A3.
- 3.3 The bidder will ensure the availability of sufficient tools and equipment (for three simultaneous jobs in Open Hole Services and for three simultaneous jobs in cased Hole Services) with backup support to carry out logging operations & perforating services simultaneously at different locations without any rig time/Production loss.
- 3.4 Provision of equipment for logging with TLC, through drill pipe, coil tubing or tractors (where applicable) should also be available when required.
- 3.5 All types of permits / NOCs, security clearances required for operations especially pertaining to manpower, radioactive sources / explosive import, storage, transportation etc. to any location of OGDCL will be the responsibility of the bidder.
- 3.6 OGDCL technical evaluation team may visit bidder's operational bases to physically verify the presence of quoted tools as part of technical evaluation process.

4. BASE FACILITIES

The bidder must have its suitably equipped base facilities for repair / maintenance, data processing / interpretation etc. and back up equipment/system support for smooth execution of logging and perforating services. Any bidder willing to avail extra time for the arrangement of tools, equipment, explosives and allied accessories etc. will be allowed 120 days period for arrangements from the issuance of LOI (120 days' time period will only be applicable for those bidders who ask for the same in writing along with the technical bid). For bidders availing 120 days period, the contract will start after 120 days from the issuance of LOI.

5. PERSONNEL

The bidder shall provide experienced professionals to perform logging, perforating and data processing/interpretation services. CVs to be submitted with the bid to appraise the competency level.

6. PREPARATION OF BIDS

- 6.1 For Open Hole services, the bidders shall prepare their bid in two parts i.e. Technical proposal (part-1) one original & one copy accompanied by soft copy on CD and Financial proposal (part-2) original.
- 6.2 For Cased Hole services, the bidders shall prepare their bid in two parts i.e. Technical proposal (part-1) one original & one copy accompanied by soft copy on CD and Financial proposal (part-2) original.
- 6.3 Bidders participating in both Open Hole and Cased Hole must submit two separate bids along with respective bid bonds.
- 6.4 The Technical proposal shall contain the details as per Annexure-A2 for Open Hole Services and as per Annexure-A3 for Cased Hole Services.
- 6.5 The bidders shall prepare their bids in line with given **wireline services / nomenclature or equivalent** services as per Annexure A2, A3 and details mentioned in RFQ.
- 6.6 The Financial proposal should indicate all prices/rates as specified in RFQ for Open Hole and Cased Hole. Any Hi-Tech/New Technology service which can be used to achieve the objective and not part of the financial model may also be quoted separately on the similar format. However financial evaluation will be strictly based on given financial models in RFQ.
- 6.7 POL such as HSD (Diesel) and lubricants will be issued by OGDCL (if required) to wireline units during logging operations and the same will be adjusted / deducted from the service company invoices at the time of payment. OGDCL shall provide accommodation and messing for contractor's personnel during stay at field.

7. BID VALIDITY

- 7.1 The bid shall remain valid and open for acceptance for a period of 180 days from the specified date of tender opening.

8. WIRELINE DELIVERABLES

- 8.1 One (1) set of rush prints along with one CD containing digital data at well site right after completion of the job.
- 8.2 Seven (7) sets of prints of all the logs within 5 days after completion of the job.
- 8.3 Three (3) CD's containing DLIS, LAS, LIS and PDF formats within 5 days after completion of the job.

9. DATA PROCESSING / INTERPRETATIONS DELIVERABLES

- 9.1 Four (4) sets of comprehensive reports with interpretation plots.
- 9.2 One (1) CD with each report containing digital data of final report in PDF format.

10. EVALUATION OF PROPOSALS

- 10.1 The technical proposal shall be reviewed first to determine the responsiveness according to the information required vide Annexure-A2 for Open Hole Services and Annexure-A3 for Cased Hole Services. Technical proposals not conforming to and deviating materially from the specifications and the conditions laid down in the Tender Documents shall be determined to be non-responsive and shall be rejected by the Company.
- 10.2 Bids for both Open Hole Services and Cased Hole Services will be evaluated separately and independently.
- 10.3 Technical evaluation will be based on the following criteria's.

DETAIL OF TECHNICAL BID EVALUATION CRITERIA FOR OPEN HOLE SERVICES

Descriptions	Point Value	
	Score	Section %
Equipment & Services		55%
Equipment, tools & services quoted by Contractor to meet OGDCL job requirements for: <ul style="list-style-type: none"> i. Intermediate Logging ii. Reservoir Section Logging iii. Auxiliary Services 	15 25 15	
Contractor's Experience		15%
<ul style="list-style-type: none"> • Contractor's International OR Local experience & reputation in equipment and related services (11 points for 10-15 years, 15 points for 15+ years). • Zero points for less than 10 years of experience 	15	
Contractor's Services Base		10%
Contractor's Wireline Services Base in Pakistan. <ul style="list-style-type: none"> • Upto one existing base / assurance of establishing base = 7 • Upto two existing bases = 10 	10	
Personal Qualification & Experience		10%
Average Experience of Contractor's proposed key personnel. <ul style="list-style-type: none"> • Experience > 8 years = 10 • Experience 6-8 years = 8 • Experience 3-5 years = 7 • Experience < 3 years = 0 	10	
HSE System		10%
Contractor's HSE performance Zero HSE incident in last 1 years = 10 points One HSE incident in last 1 years = 8 points Two HSE incident in last 1 years = 7 points Three HSE incident in last 1 years = 6 points	10	
TOTAL POINT VALUE	100	100%
TECHNICAL QUALIFICATION (Minimum Score)	75	

DETAIL OF TECHNICAL BID EVALUATION CRITERIA FOR CASED HOLE SERVICES

Descriptions	Point Value	
	Score	Section %
Equipment & Services		55%
Equipment, tools & services quoted by Contractor to meet OGDCL job requirements for:		
I. Complete Range of Perforating Services	20	
II. Production Logging and Casing Evaluation	20	
III. Pipe Recovery, BP/Packer Setting/Thru Tubingservices	15	
Contractor's Experience		15%
<ul style="list-style-type: none"> Contractor's International OR Local experience & reputation in equipment and related services (11points for 10-15 years, 15 points for 15+ years). Zero points for less than 10 years of experience 	15	
Contractor's Services Base		10%
Contractor's Wireline Services Base in Pakistan.		
<ul style="list-style-type: none"> Upto one existing base / assurance of establishingbase = 7 Upto two existing bases = 10 	10	
Personal Qualification & Experience		10%
Average Experience of Contractor's proposed key personnel.		
<ul style="list-style-type: none"> Experience > 8 years = 10 Experience 6-8 years = 8 Experience 3-5 years = 7 Experience < 3 years = 0 	10	
HSE System		10%
Contractor's HSE performance		
Zero HSE incident in last 1 years = 10 points One HSE incident in last 1 years = 8 points Two HSE incident in last 1 years = 7 points Three HSE incident in last 1 years = 6 points	10	
TOTAL POINT VALUE	100	100%
TECHNICAL QUALIFICATION (Minimum Score)	75	

- 10.4 The financial bids of the bidders obtaining less than 75% marks on the aggregate will not be opened.
- 10.4 The bidder must get minimum 70% marks in each category. Any bidder getting less than 70% marks in any category will be disqualified.
- 10.5 After completion of Technical Evaluation, the financial proposal of technically qualified bidders will only be opened and examined to determine the lowest evaluated bid.
- 10.6 The bidder must provide un-priced copy of their financial proposal as per given format with the technical bid.
- 10.7 For the purpose of determining the lowest evaluated bid, cost as per financial model in RFQ for Open Hole and Cased Hole will be taken into consideration. Optional equipment will not be considered for financial evaluation. However; bidder(s) should quote their firm prices on the similar format for any auxiliary / additional equipment / techniques or services not included in the schedule of requirement or financial evaluation model but required for Wireline logging & perforation operations as per technical requirement. Firm prices & clear discounts/ rebates (if any) for all the services referred in the proposal may be quoted. *Conditional prices or rebates will not be considered for evaluations.* Bidders are required to quote all items as per RFQ (For Open Hole and Cased Hole bids). Incomplete bids will be rejected and not considered for the financial evaluation.

11 **Payment Terms**

- 11.1 Service Company will submit the invoices duly signed and stamped by OGDCL representatives after completion of job & submission of final data to OGDCL head office Islamabad.
- 11.2 The invoices will be submitted in US Dollars. However payment will be made in equivalent Pak Rupees at the prevalent rate on the date of payment after technical and contractual verification.

TECHNICAL SPECIFICATIONS OF OPEN HOLE SERVICES

Conventional and Slim Tools	
Equipment /Tools	Specification /Features
Logging Unit	<ul style="list-style-type: none"> Truck / Skid mounted Wireline Logging Unit for carrying out all type of Open Hole and Perforations services etc. on OGDCL wells.
Intermediate Section	
Spontaneous Potential	<ul style="list-style-type: none"> Spontaneous Potential Tool
Temperature	<ul style="list-style-type: none"> Temperature Tool measuring min. 300°F
Induction Tool	<ul style="list-style-type: none"> Induction Tool with 5 curves output data Minimum Depth of Investigation: 85 inch deep curve Range of Measurement: 0.1-2000 ohm-m Vertical Resolution = 4 ft
Sonic Tool	<ul style="list-style-type: none"> High resolution Bore hole Compensated Sonic tool Minimum Depth of Investigation: 3 inch Range of Measurement: 40-240 usec / ft Vertical Resolution compressional = 2ft Accuracy = +/- 2 us/ft
Gamma Ray	<ul style="list-style-type: none"> Gamma Ray Tool Minimum Depth of Investigation: 12 inch Vertical Resolution = 1 ft Range of Measurement: 400 API
Borehole Geometry tool	<ul style="list-style-type: none"> Standalone proper caliper tool (4 & 6 Arm) is required for 24", 17-1/2", 12-1/4", 8-1/2", 6" and 5-7/8" hole. Minimum Depth of Investigation: Hole diameter
Cement Evaluation	<ul style="list-style-type: none"> Cement Bond / Variable Density logging tool is required Minimum Depth of Investigation: Casing to cement interface
Reservoir Section	
Resistivity Tool	<ul style="list-style-type: none"> High Resolution Laterolog Tool with 4 curves output Minimum Depth of Investigation: 48 inch Range of Measurement: 0.2-2000 ohm-m Vertical Resolution = 24 inch

Micro Resistivity Tool	<ul style="list-style-type: none"> • Micro Spherical Focused Tool • Minimum Depth of Investigation: 03 inch • Range of Measurement: 0.2-2000 ohm-m • Vertical Resolution = 18 inch
Navigation Tool	<ul style="list-style-type: none"> • Navigation Tool is required for Deviation & Azimuth survey
Neutron Porosity Tool	<ul style="list-style-type: none"> • High resolution Compensated neutron porosity tool with TNPH and NPHI outputs. • Minimum Depth of Investigation: 10 inch • Range of Measurement: 0-60 pu
Spectral Natural Gamma Ray	<ul style="list-style-type: none"> • Natural Gamma Ray is required for Potassium, Thorium and Uranium measurements. • Range of Measurement: 0-1000 API
	<ul style="list-style-type: none"> • Vertical Resolution = 15 inch • Depth of Investigation = 9.5 inch
Density Log	<ul style="list-style-type: none"> • High resolution Litho-density with Photoelectric Absorption Coefficient tool • Minimum Depth of Investigation: 5 inch • Vertical Resolution = 19 inch
Array Sonic Tool	<ul style="list-style-type: none"> • Mono/Dipole Sonic with Cross dipole, P and S, Stonely, Full wave array sonic tools are required. • Minimum Depth of Investigation: 09 inch • Range of Measurement: As fast as for P waves 40 us/ ft and slowness as 700 us/ ft • Accuracy = 2 us/ft
Acoustic Scanning Tool	<ul style="list-style-type: none"> • Acoustic scanning tool is required to measure borehole compensated monopole with long and short spacing, cross • dipole
Electric MicroImager Tool	<ul style="list-style-type: none"> • Electric Micro Imager with Navigation tool • Minimum Depth of Investigation: 0.2 inch • Vertical Resolution = 0.2 inch • Minimum Range of Measurement: 70% borehole coverage in 8.5" hole
Electric MicroImager Tool (OBM)	<ul style="list-style-type: none"> • Electric Micro Imager for Oil Base Mud • Minimum Depth of Investigation: 0.3inch • Range of Measurement: Provide maximum borehole coverage
Acoustic Bore Hole Imager	<ul style="list-style-type: none"> • Acoustic Bore hole Image tool with inclinometer tool • Minimum Depth of Investigation: Bore hole wall • Range of Measurement: 12 inch

	<ul style="list-style-type: none"> Vertical Resolution = 0.4 inch
Ultra Sonic Image Tool	<ul style="list-style-type: none"> Ultra sonic Image {Cement & Corrosion Evaluation} tool Standard and High Resolution modes / images Minimum Depth of Investigation: Casing to cement interface for bond and corrosion evaluation. Vertical Resolution = 4 inch Range of Measurement: Acoustic impedance 0 to 10 Mrayl (0 to 10 MPa s/m)
Litho Scanner / Geochemical Spectroscopy Instrument / FLeX or equivalent	<ul style="list-style-type: none"> Should measure minimum 14 elements (Al, Ca, C, Cl, Gd, H, Fe, Mg, Mn, O, K, Si, S, Ti) for enhanced reservoir characterization
Nuclear Magnetic Resonance (CMR+AT / FMR / MReX or equivalent	<ul style="list-style-type: none"> For complex fluid characterization and tightrock / unconventional evaluation. For wide range of T1/T2, diffusion application along with conventional bound/free and total porosity.
Mechanical / Rotary Sidewall Coring	<ul style="list-style-type: none"> Minimum core capacity per run = 25 Minimum core length = 1.75 inch Minimum Core Diameter = 0.9 inch
Wireline BOP + Stuffing Box	<ul style="list-style-type: none"> Wireline BOP and stuffing box required during logging in different sections and perforation jobs with min rating of 3000 psi
Vertical Seismic Profile / Imager	<ul style="list-style-type: none"> Borehole tool has to be a three-component system compatible of performing services with vibrators as well as air guns, providing tight coupling between tool and casing. VSI tool with up to 8 shuttles required.
Wireline Formation Tester	<ul style="list-style-type: none"> Wireline Formation Tester including (but not limited to) Pressure & Temperature recording with quartz/strain/sapphire gauges (min two gauges required). Single and Dual Probe for Pressure points and sampling with standard/Large Diameter/ Extra Large Diameter probe. Dual Packer module for pressure transient testing and sampling Sampling Module (min 6 samples per run) Live Fluid analyzer Module (Resistivity & Optical Based) Pump out Module for sampling (including high pressure displacement unit)

Formation evaluation using slim hole tools	<ul style="list-style-type: none"> • Slim Resistivity Tool (Maximum OD 2.75") • Slim Density (Maximum OD 2.75") • Slim Neutron Porosity (Maximum OD 2.75") • Slim Sonic (Maximum OD 2.75") • Slim Gamma Ray (Maximum OD 2.75") • Slim tools utility is not limited to slim holes only. They can also be utilized in bigger hole sizes depending on borehole conditions as per OGDCL requirements to minimize • operational risks.
Behind Casing Reservoir Evaluation Tools	<ul style="list-style-type: none"> • Resistivity • Density • Neutron Porosity • Sonic • Gamma Ray
Auxiliary Services	
Well Head Pressure Control Equipment	<ul style="list-style-type: none"> • Well Head Pressure Control Equipment (10k psi) required for logging in different sections & other jobs.
Casing collar locator tool	<ul style="list-style-type: none"> • Casing collar locator tool for detecting collars of different casings.
Free Point indicators	<ul style="list-style-type: none"> • Free point Indicator services for different drill collars, drill pipes & Tubings.
Back Off Service	<ul style="list-style-type: none"> • Back off Service for all sizes of drill collars, drill pipes & Tubings.

Perforation for Pipe Recovery	<ul style="list-style-type: none"> • 1-11/16" or smaller gun to perforate Drill Pipe / Drill Collars / Heavy Weight Drill Pipes for resuming circulation.
Drill Pipe Colliding/ Severing Tool	<ul style="list-style-type: none"> • Drill pipe Colliding/Severing Tool is required for the following tubular: • DC's from 11" to 3-1/8" • HWDP's of 6-5/ 8" to 3 1/2" • DP's of 5-1/2", 5", 3-1/2" & 2-7/8"
Wireline Fishing Tools	<ul style="list-style-type: none"> • The Contractor shall maintain its fishing equipment inventory being capable of fishing all downhole wire line tools.
GR-CCL	<ul style="list-style-type: none"> • Gamma ray and CCL for depth correlation
Dummy / Depth Determination	<ul style="list-style-type: none"> • For any hole/casing/tubing/drill pipe size with active sensors like GR or/and CCL.
Tough Logging	<ul style="list-style-type: none"> • TLC equipment is required for deviated / slant wells.
Logging While Fishing	<ul style="list-style-type: none"> • Equipment/subs for logging while fishing.
Coiled Tubing Logging	<ul style="list-style-type: none"> • CTL compatible equipment for real time data acquisition.
Data Processing / Interpretations	
Data Output, Interpretations And Reports	<ul style="list-style-type: none"> • Rush prints at well site, processed data within 24hrs and interpretation reports (when required) within due time.

Foot Notes for Open Hole Services:

- Cost of the above mentioned services or equivalent may be quoted.
- A service charge will be applied only once under one MOB/DEMOB.
- Some services are overlapping between Open Hole and Cased hole contracts. If same contractor exists in both open hole and cased hole sections, then lower service cost will be applicable out of two contracts.
- If same contractor is doing both open hole and cased hole jobs in continuation, then minimum of only one service charge, one mob/Demob and one BOP/PCE (If applicable) of the two contracts will be charged.
- Any other service / technology not covered above like Jars, latest tech. tools, special cutters etc may be mentioned separately as per above format as optional.
- Firm cost may be quoted and NIL may be mentioned whichever is not applicable
- In case of TLC, no deviation charge will be applicable.
- H2S / CO2 surcharge will only be applicable if H2S / CO2 is a known phenomenon in the concerned field and it must be quantified on the field ticket, duly signed by OGDCL field representative at site.
- Sub-Total of each service will be calculated assuming depth=4000M and survey interval=1000M. Total / service will be calculated by multiplying sub-total with job frequency multiplication factor.
- When a Natural Gamma Ray Spectroscopy is recorded, no Gamma Ray charge will be applied for Gamma Ray recorded in combination with several different services under same MOB/DEMOB charge.
- Any depth, survey, run charge etc. where applicable will be applied once from surface to the actual deepest depth recorded with a service irrespective of number of runs made with that service under one MOB/DEMOB charge.
- For free point job both stretch and torque measurements are required for stations to be valid unless technically and operationally justified by OGDCL field representative on the field ticket.
- Resistivity data will be inclusive of SP curve.
- For dipole / BCR / Anisotropy jobs depth and survey charges will be inclusive of centralization and GPIT charges. However, data of caliper and GPIT will be provided. Depth and survey charges of all borehole imaging tools will be inclusive of GPIT charges
- During Formation Testing service no pressure charge will be made for setting when no seal is obtained. Each fluid sample will include a pressure recording at no extra charge. Sample charge will be valid only if sample is fully recovered as per specified volume. For LFA & Pump out modules, sample charge will be applicable only if sample is taken, however if only cleanout was the objective then cleanout charge will be applicable. In case both samples taken and cleanouts done, only one depth charge of Pump out & LFA applicable. Probe charges quoted above will be same for all types of probes.
- VSI charges will be inclusive of cost for Vibros etc.
- Any allied accessories/tool jewelry needed for smooth operation of above mentioned services will be responsibility of Service Company at no extra charge.
- Above mentioned cost is for financial evaluation purpose only. However, payment will be made at actual against verified invoices and in Pak Rupees at exchange rate prevalent on the date of payment.
- All tools mentioned in the table above should be the latest generation, and price quoted above will be inclusive of all modes pertaining to that tool.
- Slim Tools utility is not limited to slim holes only. They can also be utilized in bigger hole sizes as per Annexure-2 depending upon borehole conditions.
- ECRD activation & release charge will only be applicable if the weak point is released successfully as per mutual consent of OGDCL & the contractor.
- Standby cost of the above mentioned equipment or equivalent may be quoted.
- Standby will start after 10 free days of each line item are consumed.

- Standby will be applicable after the equipment/crew arrives at the well site and released by the Company.
- Total cost of each perforating gun system is required assuming depth=4000M and perforating interval as mentioned above against each gun system
- Perforation depth charge will be measured to the deepest shot. It will be applied only once for a series of runs made under the same service charge
- Above perforation charges are inclusive of all types of blank guns, spacers, hardware charges and penetration analysis report.
- BOP / Pressure Control Equipment quoted rates will be inclusive of H2S / CO2 surcharge.
- BOP/Pressure Control Equipment charges will be applied once under one MOB/DEMOB charge.
- Mob/Demob charges include complete transportation of logging unit, personnel, equipment, Explosive, Radioactive material and related accessories/ third party transportation to and back from the well site.
- If an operation cannot be completed due to failure / malfunctioning of equipment no charge will be applied.
- If an operation is attempted but cannot be completed due to well conditions or if an operation is cancelled by the client while equipment is in the hole, IO will be applicable. Only one IO charge per toolstring will be applicable in one run. In case of I/O, minimum of following of the two charges will be applicable:
 - 1) Maximum Charge per run quoted by bidder at serial # 1.254 in RFQ

OR

2) Maximum of the depth charges of the toolstring (as defined in RFQ) to the depth reached.

- If crew and equipment reached well site and all operations are cancelled by client before start of rig up, it will be treated as cancelled operation. Only Mob/Demob charges will be applicable as defined in RFQ.
- "Any other processing" includes every possible additional processing pertaining to that tool not mentioned in above tables.
- Any other module of processing not covered above may be quoted separately as optional.
- Above charges are inclusive of Report writing.
- Evaluation shall be carried out on complete package basis excluding optional services.
- Incomplete bids shall not be considered for evaluations and shall be rejected.

TERMS OF REFERENCE (TOR)
FOR
HIRING OF WIRELINE LOGGION & PERFORATION SERVICES
(Open Hole & Cased Hole Sections)

1. SCOPE OF WORK

- 1.1 Wireline logging, perforating and log data processing / interpretation services are required on “CALL OUT” basis for a period of three years from the issuance of LOI (subject to clause # 4 of TOR) on Exploratory, Appraisal, Development and Work over wells of OGDCL in the region of KPK & Baluchistan provinces of Pakistan.
- 1.2 The tender has been divided into “Open Hole” and “Cased Hole” sections. The bidders will have option to bid either for one of section or both sections.
- 1.3 The contracts will be awarded separately for Open Hole and cased Hole sections after respective technical and financial evaluations as per defined annexures and RFQ.
- 1.4 The estimated number of wells for Open Hole section is 30 with 50 jobs for the above mentioned period.
- 1.5 The estimated number of wells for Cased Hole section is 50 with 150 jobs for the above mentioned period.

2. ELIGIBILITY REQUIREMENTS

The bidder:

- 1.6 Must have minimum 10 years international or local experience of providing above mentioned services.
- 1.7 Must have dedicated team of experienced professionals to handle technical matters relating to all types of wireline logging operations, perforations and logs data processing/interpretation services.
- 1.8 Must be capable of providing required services / equipment as per Annexure-A2 (for Open Hole) and Annexure-A3 (for Cased Hole).
- 1.9 Must be capable of providing Wireline services simultaneously on **at least three OGDCL wells** located in the region for Open Hole services.
- 1.10 Must be capable of providing Wireline services simultaneously on **at least three OGDCL wells** located in the region for Cased Hole services.
- 1.11 Must confirm to carry out jobs at locations where OGDCL is active in operations.

2. TOOLS/EQUIPMENT/NOC's

- 2.1 Tools specified in Annexure-A2 & Annexure-A3 should be suitable to perform services within temperature range of 300°F to 350 °F. Tools having temperature rating more than 350 °F should also be made available as and when required for logging on high temperature wells. H2S & CO2 rated tools/equipment should also be available when required.

- 2.2 The bidder should provide the latest tools/surface acquisition and allied equipment for performing logging and perforating services as per Annexure- A2 & Annexure-A3.
- 2.3 The bidder will ensure the availability of sufficient tools and equipment (for three simultaneous jobs in Open Hole Services and for three simultaneous jobs in cased Hole Services) with backup support to carry out logging operations & perforating services simultaneously at different locations without any rig time/Production loss.
- 2.4 Provision of equipment for logging with TLC, through drill pipe, coil tubing or tractors (where applicable) should also be available when required.
- 2.5 All types of permits / NOCs, security clearances required for operations especially pertaining to manpower, radioactive sources / explosive import, storage, transportation etc. to any location of OGDCL will be the responsibility of the bidder.
- 2.6 OGDCL technical evaluation team may visit bidder's operational bases to physically verify the presence of quoted tools as part of technical evaluation process.

3. **BASE FACILITIES**

The bidder must have its suitably equipped base facilities for repair / maintenance, data processing / interpretation etc. and back up equipment/system support for smooth execution of logging and perforating services. Any bidder willing to avail extra time for the arrangement of tools, equipment, explosives and allied accessories etc. will be allowed 120 days period for arrangements from the issuance of LOI (120 days' time period will only be applicable for those bidders who ask for the same in writing along with the technical bid). For bidders availing 120 days period, the contract will start after 120 days from the issuance of LOI.

4. **PERSONNEL**

The bidder shall provide experienced professionals to perform logging, perforating and data processing/interpretation services. CVs to be submitted with the bid to appraise the competency level.

5. **PREPARATION OF BIDS**

- 5.1 For Open Hole services, the bidders shall prepare their bid in two parts i.e. Technical proposal (part-1) one original & one copy accompanied by soft copy on CD and Financial proposal (part-2) original.
- 5.2 For Cased Hole services, the bidders shall prepare their bid in two parts i.e. Technical proposal (part-1) one original & one copy accompanied by soft copy on CD and Financial proposal (part-2) original.
- 5.3 Bidders participating in both Open Hole and Cased Hole must submit two separate bids along with respective bid bonds.
- 5.4 The Technical proposal shall contain the details as per Annexure-A2 for Open Hole Services and as per Annexure-A3 for Cased Hole Services.
- 5.5 The bidders shall prepare their bids in line with given **wireline services / nomenclature or equivalent** services as per Annexure A2, A3 and details mentioned in RFQ.
- 5.6 The Financial proposal should indicate all prices/rates as specified in RFQ for Open Hole and Cased Hole. Any Hi-Tech/New Technology service which can be used to achieve the objective and not part of the financial model may also be quoted separately on the similar format. However financial evaluation will be strictly based on given financial models in RFQ.
- 5.7 POL such as HSD (Diesel) and lubricants will be issued by OGDCL (if required) to wireline units during logging operations and the same will be adjusted / deducted from the service company invoices at the time of payment.

5.8 OGDCL shall provide accommodation and messing for contractor's personnel during stay at field.

6. BID VALIDITY

6.1 The bid shall remain valid and open for acceptance for a period of 180 days from the specified date of tender opening.

7. WIRELIN DELIVERABLES

- 7.1 One (1) set of rush prints along with one CD containing digital data at well site right after completion of the job.
- 7.2 Seven (7) sets of prints of all the logs within 5 days after completion of the job.
- 7.3 Three (3) CD's containing DLIS, LAS, LIS and PDF formats within 5 days after completion of the job.

8. DATA PROCESSING / INTERPRETATIONS DELIVERABLES

- 8.1 Four (4) sets of comprehensive reports with interpretation plots.
- 8.2 One (1) CD with each report containing digital data of final report in PDF format.

9. EVALUATION OF PROPOSALS

- 9.1 The technical proposal shall be reviewed first to determine the responsiveness according to the information required vide Annexure-A2 for Open Hole Services and Annexure-A3 for Cased Hole Services. Technical proposals not conforming to and **deviating materially from the specifications and the conditions laid down in the Tender Documents shall be determined to be non-responsive and shall be rejected by the Company.**
- 9.2 Bids for both Open Hole Services and Cased Hole Services will be evaluated separately and independently.
- 9.3 Technical evaluation will be based on the following criteria's.

DETAIL OF TECHNICAL BID EVALUATION CRITERIA FOR OPEN HOLE SERVICES

Descriptions	Point Value	
	Score	Section %
Equipment & Services		55%
Equipment, tools & services quoted by Contractor to meet OGDCL job requirements for:		
i. Intermediate Logging	15	
ii. Reservoir Section Logging	25	
iii. Auxiliary Services	15	
Contractor's Experience		15%
<ul style="list-style-type: none"> • Contractor's International OR Local experience & reputation in equipment and related services (11 points for 10-15 years, 15 points for 15+ years). • Zero points for less than 10 years of experience 	15	
Contractor's Services Base		10%
Contractor's Wireline Services Base in Pakistan.		
<ul style="list-style-type: none"> • Upto one existing base / assurance of establishing base = 7 • Upto two existing bases = 10 		
Personal Qualification & Experience		10%

DETAIL OF TECHNICAL BID EVALUATION CRITERIA FOR CASED HOLE SERVICES

Descriptions	Point Value	
	Score	Section %
Equipment & Services		55%
Equipment, tools & services quoted by Contractor to meet OGDCL job requirements for:		
I. Complete Range of Perforating Services	20	
II. Production Logging and Casing Evaluation	20	
III. Pipe Recovery, BP/Packer Setting/Thru Tubing services	15	
Contractor's Experience		15%
<ul style="list-style-type: none"> Contractor's International OR Local experience & reputation in equipment and related services (11 points for 10-15 years, 15 points for 15+ years). Zero points for less than 10 years of experience 	15	
Contractor's Services Base		10%
Contractor's Wireline Services Base in Pakistan.		
<ul style="list-style-type: none"> Upto one existing base / assurance of establishing base = 7 Upto two existing bases = 10 	10	
Personal Qualification & Experience		10%
Average Experience of Contractor's proposed key personnel.		
<ul style="list-style-type: none"> Experience > 8 years = 10 Experience 6-8 years = 8 Experience 3-5 years = 7 Experience < 3 years = 0 	10	
HSE System		10%
Contractor's HSE performance		
Zero HSE incident in last 1 years = 10 points One HSE incident in last 1 years = 8 points Two HSE incident in last 1 years = 7 points Three HSE incident in last 1 years = 6 points	10	
TOTAL POINT VALUE	100	100%
TECHNICAL QUALIFICATION (Minimum Score)	75	

10.4 T

he financial bids of the bidders obtaining less than 75% marks on the aggregate will not be opened.

10.5 T

he bidder must get minimum 70% marks in each category. Any bidder getting less than 70% marks in any category will be disqualified.

10.6 A

After completion of Technical Evaluation, the financial proposal of technically qualified bidders will only be opened and examined to determine the lowest evaluated bid.

10.7 T

he bidder must provide un-priced copy of their financial

proposal as per given format with the technical bid.

- 10.8 For the purpose of determining the lowest evaluated bid, cost as per financial model in RFQ for Open Hole and Cased Hole will be taken into consideration. Optional equipment will not be considered for financial evaluation. However; bidder(s) should quote their firm prices on the similar format for any auxiliary / additional equipment / techniques or services not included in the schedule of requirement or financial evaluation model but required for Wireline logging & perforation operations as per technical requirement. Firm prices & clear discounts
- 10.9 / rebates (if any) for all the services referred in the proposal may be quoted. Conditional prices or rebates will not be considered for evaluations. Bidders are required to quote all items as per RFQ (For Open Hole and Cased Hole bids). Incomplete bids will be rejected and not considered for the financial evaluation.

10. PAYMENT TERMS

- 10.10 Service Company will submit the invoices duly signed and stamped by OGDCL representatives after completion of job & submission of final data to OGDCL head office Islamabad.
- 10.11 The invoices will be submitted in US Dollars. However payment will be made in equivalent Pak Rupees at the prevalent rate on the date of payment after technical and contractual verification.

TECHNICAL SPECIFICATIONS OF CASED HOLE SERVICES

Conventional and Slim Tools	
Equipment /Tools	Specification /Features
Logging Unit	<ul style="list-style-type: none"> Truck / Skid mounted Wireline Logging Unit for carrying out all type of Cased Hole Logging, Perforations services etc. on OGDCL wells.
Temperature	<ul style="list-style-type: none"> Temperature Tool measuring min. 300°F
Gamma Ray	<ul style="list-style-type: none"> Gamma Ray Tool Minimum Depth of Investigation: 12 inch Vertical Resolution = 1 ft Range of Measurement: 400 API
Cement Evaluation	<ul style="list-style-type: none"> Cement Bond / Variable Density logging tool is required Minimum Depth of Investigation: Casing to cement interface
Ultra Sonic Image Tool	<ul style="list-style-type: none"> Ultra sonic Image {Cement & Corrosion Evaluation} tool Standard and High Resolution modes / images Minimum Depth of Investigation: Casing to cement interface for bond and corrosion evaluation. Vertical Resolution = 4 inch Range of Measurement: Acoustic impedance 0 to 10 Mrayl (0 to 10 MPa s/m)
Wireline BOP + Stuffing Box	<ul style="list-style-type: none"> Wireline BOP and stuffing box required during logging in different sections and perforation jobs with min rating of 3000 psi
Auxiliary Services	
Well Head Pressure Control Equipment	<ul style="list-style-type: none"> Well Head Pressure Control Equipment (10k to 15k psi) required for logging in different sections, production logging, Perforation & other jobs.
Casing collar locator tool	<ul style="list-style-type: none"> Casing collar locator tool for detecting collars of different casings.
Free Point indicators	<ul style="list-style-type: none"> Free point Indicator services for different drill collars, drill pipes & Tubings.
Back Off Service	<ul style="list-style-type: none"> Back off Service for all sizes of drill collars, drill pipes & Tubings.
RCT / Power Cutter	<ul style="list-style-type: none"> For cutting Tubings of all sizes.
Tubing Puncher	<ul style="list-style-type: none"> Tubing Puncher Tools for all types of completion strings / tubings available in OGDCL.

Wireline Fishing Tools	<ul style="list-style-type: none"> The Contractor shall maintain its fishing equipment inventory being capable of fishing all downhole wire line tools.
GR-CCL / TCP Correlation	<ul style="list-style-type: none"> 1-11/16" tool (stand alone or combinable) with Gamma ray and CCL for depth correlation inside 9-5/8", 7" and 5" casings / liners / through DST strings and completions.
Dummy / Depth Determination	<ul style="list-style-type: none"> For any hole/casing/tubing/drill pipe size with active sensors like GR or/and CCL.
Bridge PlugSetting	<ul style="list-style-type: none"> Bidder to provide bridge plug setting tool for 9-5/8", 7" & 5" bridge plugs through Wireline.
Production Packer Setting	<ul style="list-style-type: none"> Bidder to provide bridge plug setting tool for 9-5/8", 7" & 5" production packers through Wireline.
Through Tubing Bridge PlugSetting	<ul style="list-style-type: none"> Through tubing bridge plug setting tool (1-11/16" & 2-1/8") and inflatable plugs (1-11/16" & 2-1/8") capable of setting inside 9-5/8", 7" & 5" casings/liners.
Cementing Dumping	<ul style="list-style-type: none"> Wireline conveyed cement dumping services (1-11/16" & 2- 1/8") above through tubing bridge plugs.
Gauge Ring & Junk Basket	<ul style="list-style-type: none"> Wireline conveyed gauge ring and junk basket services for all casing & liner sizes.
Corrosion Monitoring Tools	<ul style="list-style-type: none"> Tools for corrosion monitoring and integrity of tubing and casings of different sizes.
Coiled TubingLogging	<ul style="list-style-type: none"> CTL compatible equipment for real time data acquisition.
Perforating Services (RDX, HMX, HNS & PYX Explosive)	
HSD Gun System	<ul style="list-style-type: none"> Gun sizes 2-7/8" to 4-1/2" Deep penetrating charges with advanced applications. Conventional and high end technology
Spiral / Strip Gun System	<ul style="list-style-type: none"> Gun sizes 1-11/16" & 2-1/8" with magnetic positioning devices. Deep penetrating charges with advanced applications. Conventional and high end technology
Production Logging Services	
ProductionLogging	<ul style="list-style-type: none"> Standard Production logging suite includes but not limited to pressure / temperature / fluid density / flow meter / GR / CCL inside 9-5/8", 7" & 5" casings / liners. Water Hold up, Gas Hold up, Water flow log. Other Services Production logging suite for highly deviated wells. 3-phase water holdup (horizontal, highly deviated and vertical well with

	<p>conveyance method.</p> <ul style="list-style-type: none"> • Production logging in conveyance method with CT and tractor in real time
Cased Hole Reservoir Saturation Tool	<ul style="list-style-type: none"> • Cased hole reservoir saturation tool to measure porosity, sigma, water velocity, phase velocity and bore hole holdup • Minimum Depth of Investigation: 12 inch.
Spectral Noise Log	<ul style="list-style-type: none"> • For identifying water channeling behind casing and for determining dual string flow, fracture flow, leak detection, cement seal integrity and packer seal integrity.
Multi Barrier Corrosion Monitoring Tool	<ul style="list-style-type: none"> • To detect multi-barrier tubing and casing thickness / metal loss using electromagnetic principle.
Downhole Camera	<ul style="list-style-type: none"> • High resolution cameras for providing vivid, high frame rate color videos in real-time, enabling rapid and effective evaluation of complex well issues like imaging dropped objects and wellbore fish, mechanical inspection of wellbore hardware, inspection and monitoring of corrosion and erosion, perforation inspection to measure perforation size and optimize frac/perf programs, detecting water entry in gas wells and oil entry in high water cut wells, gas storage inspection, open hole imaging of barefoot completions, leak and cross-flow detection, sand entry detection etc.
Tractor	<ul style="list-style-type: none"> • Conveyance for wireline string in highly deviated and horizontal wells.
Data Processing / Interpretations	
Data Output, Interpretations And Reports	<ul style="list-style-type: none"> • Rush prints at well site, processed data within 24hrs and interpretation reports (when required) within due time.

Foot Notes for Cased Hole Services:

- Cost of the above mentioned services **or equivalent** may be quoted.
- A service charge will be applied only once under one MOB/DEMOB.
- Some services are overlapping between Open Hole and Cased hole contracts. If same contractor exists in both open hole and cased hole sections, then lower services cost will be applicable out of two contracts.
- If same contractor is doing both open hole and cased hole jobs in continuation, then minimum of only one service charge, one mob/Demob and one BOP/PCE (If applicable) of the two contracts will be charged.
- Any other service / technology not covered above like Jars, latest tech. tools, special cutters etc. may be mentioned separately as per above format as optional.
- Firm cost may be quoted and NIL may be mentioned whichever is not applicable
- H2S / CO2 surcharge will only be applicable if H2S / CO2 is a known phenomenon in the concerned field and it must be quantified on the field ticket, duly signed by OGDCL field representative at site.
- Sub-Total of each service will be calculated assuming depth=4000M and survey interval=1000M. Total / service will be calculated by multiplying sub-total with job frequency multiplication factor.
- Any depth, survey, run charge etc. where applicable will be applied once from surface to the actual deepest depth recorded with a service irrespective of number of runs made with that service under one MOB/DEMOB charge.
- For free point job both stretch and torque measurements are required for stations to be valid unless technically and operationally justified by OGDCL field representative on the field ticket.
- Any allied accessories/tool jewelry needed for smooth operation of above mentioned services will be responsibility of service company at no extra charge. Above mentioned cost is for financial evaluation purpose only. However, payment will be made at actual against verified invoices and in Pak Rupees at exchange rate prevalent on the date of payment.
- All tools mentioned in the table above should be the latest generation, and price quoted above will be inclusive of all modes pertaining to that tool.
- ECRD activation & release charge will only be applicable if the weak point is released successfully as per mutual consent of OGDCL & the contractor.
- Standby cost of the above mentioned equipment or equivalent may be quoted.
- Standby will start after 10 free days of each line item are consumed.
- Standby will be applicable after the equipment/crew arrives at the well site and released by the Company.
- Total cost of each perforating gun system is required assuming depth=4000M and perforating interval as mentioned above against each gun system
- Perforation depth charge will be measured to the deepest shot. It will be applied only once for a series of runs made under the same service charge
- Above perforation charges are inclusive of all types of blank guns, spacers, hardware charges and penetration analysis report.
- BOP / Pressure Control Equipment quoted rates will be inclusive of H2S / CO2 surcharge.
- BOP/Pressure Control Equipment charges will be applied once under one MOB/DEMOB charge.
- Mob/Demob charges include complete transportation of logging unit, personnel, equipment, Explosive, Radioactive material and related accessories/ third party transportation to and back from the wellsite.
- If an operation cannot be completed due to failure / malfunctioning of equipment no charge will be applied.

- If an operation is attempted but cannot be completed due to well conditions or if an operation is cancelled by the client while equipment is in the hole, IO will be applicable. Only one IO charge per toolstring will be applicable in one run. In case of I/O, minimum of following of the two charges will be applicable

1) Maximum Charge per run quoted by bidder at serial # 2.254

OR

2) Maximum of the depth charges of the toolstring (as defined in RFQ) to the depth reached.

*

- If crew and equipment reached well site and all operations are cancelled by client before start of rig up, it will be treated as cancelled operation. Only Mob/Demob charges will be applicable as defined in RFQ.
- For PLT logging, one flowing survey charge will be applicable per choke size regardless of number of passes at different speeds.
- RCT rates will be inclusive of any pre-requisite service such as tubing puncture etc.
- Crane will be arranged by the service company for rigless operations when and where requested by OGDCL.
- "Any other processing" includes every possible additional processing pertaining to that tool not mentioned in above tables.
- Any other module of processing not covered above may be quoted separately as optional.
- Above charges are inclusive of Report writing
- Evaluation shall be carried out on complete package basis excluding optional services.
- Incomplete bids shall not be considered for evaluations and shall be rejected.
