## **Terms & Conditions**

- It will be mandatory for bidder to provide ORIGNAL authority letter (on original letter head pad – scanned letter will not be accepted) from Original Equipment Manufacturer (OEM)
- The OEM must have minimum 07 years of manufacturing experience without which bid will ii. not be accepted.
- Third party pre-shipment inspection if required will be arranged by OGDCL, the vendor will iii. be responsible to extend cooperation in this regard.
- For Group I, spares of TEG Model No: 1120 made by (Global Thermo electric generator's iv. Calgary Canada or equivalent shall be accepted.
- In case of equivalent parts, the vendor shall provide/submit minimum three (03) sale records of v. E&P Companies of the spares of TEG Model No: 1120 made by (Global Thermo - electric generator's Calgary Canada along with verifiable satisfactory performance certificates other than in the manufacturing country.

#### **Description of spares of Group - II**

#### 1 - Surge Diverter:

- A surge arrester should have a low impulse ratio.
- Shall have provision to be installed on pipeline with Nut bolts.
- Should be supplied with cable approx. 01 meter length.

#### 2-3 CAD WELD MOLDS & SHOTS:

- a) Graphite material capable of withstanding high temperatures
- b) Does not contain phosphorous, magnesium or any caustic, toxic or explosive substances.
- c) Low voltage battery starting (where used)
- d) Each shots should contain weld metal

#### 4 Reference Electrodes:

- Approximate overall size 1 3/8" dia & 6 3/4 " length
- Easy to use & Replaceable CPT porous plug
- Reliable & Lexan tube with window
- Rugged & Extra heavy top cap

#### 5-8 **Shunts:**

- · A shunt resistor, with provision for four-terminal sensing
- Ohmite RLS2ROE or Equivalent

#### 9-14 Wire Wound Rheostat:

- Should be easily adjustable
- Ability to pass large amount of current without being red hot
- Sliding type, thin wire (with sufficient field strength) wound over ceramic cord.

#### 15- Mixed Metal Oxide Anodes:

Mixed metal oxide anodes shall be of following specifications;

a. Type = tubular
b. Anode weight = 40lbs
c. Anode dia = 2.5 cm
d. Anode length = 50 cm

e. Anode current output = 5.5 amp max

f. Custom coil = HALAR/HMWPE OR PVDF/HMWPE

g. Coil length = 10 Meters

h. High current output

i. Extremely low and uniform consumption rate

j. Light weight, easy handling and low maintenance

#### 16 - Anode junction boxes:

- 16-gauge galvanized steel with top drip shield and seam-free sides, front and back.
- 16-gauge galvanized steel continuous hinge with stainless steel hinge pin.
- Cover fastened securely with captive plated steel screws.

- Provided with padlocking.
- Rainproof, enclosures
- mechanical terminal lugs for cable attachment
- Ample room inside the enclosure to allow easy access.
- Can counter minimum 10 Anodes.

#### 17 - Magnesium Anodes:

Sacrificial anodes- Magnesium anodes, 17 LBS bare Metal weight.

#### 17 - Current control box:

- The enclosure size should have ample room inside the enclosure to allow easy access and an improved working environment with a proper key and lock system.
- Should be installed with a wide variety of shunts, connectors, terminal blocks, slide resistors, rheostats junction or bond box assembly should include mounting requirements, ventilation needs, and current ratings as rated in attached list for 10- ways
